SHYRA

Control panels

Control panel with dip switches and potentiometers for one or two 230V/500W operators used on sliding and swing gates, shutters and overhead doors with the management of up to two sensitive edges (one of which type 8K2).
 The dual-channel radio receiver is incorporated.
 With the potentiometers, we can manage not only the automatic closing time but also the strength of the gates and slowing down time.
 Functions include the pedestrian opening (only remote controlled), fast closing and the pulse blocking function.
 The detection of faults is done via LED.

Relevant features

The terminal boards are coloured and can be removed to make it easier to perform the wiring.
