A new brand vision
to achieve new objectives

"An important step: a moment for redefining our positioning and consolidation of our values.

With new goals and new ambitions, including expanding in the tertiary sector with a full access specialist approach; being recognised as a brand close to people, thanks to a friendly and engaging language; developing and emphasizing our distinctive characteristics and strengths compared to competitors; exploiting the uniqueness of U-link to stand out in a decisive way in the market.

A Bft with a renewed brand vision, able to make a big promise: offering products and solutions designed to create the empowerment of people."

Fabio Billo
Bft Managing Director

Advanced
solutions
offering unique
and exclusive
features, for
every sector.

Full Access Specialist: that's what we have become, starting from automation in the residential context, a traditional area for Bft, which can count on 30 years of technological innovations.

A range focused on providing the control and protection of points of access to public and private structures.

Advanced parking systems, barriers and bollards integrated through the use of software dedicated to Urban Traffic Management: this is the result of the most innovative research made in Bft.

Doors open to innovation

Home Access Automation: a range of easy to install and functional products created to effectively address any situation and need. These include our sliding and swing operators (U-link and others), Magistro and all its applications in domestic environments, remote controls and the Thea photocell with integrated flashing light.

The solutions in this sector offer the possibility of simultaneously managing several access points and operators, locally and remotely. Bft also offers automation systems suitable for car parks with special requirements and for structures where it is necessary to ensure access only to authorised personnel. Bft also supplies anti-terrorism measures, intended for sensitive sites where controlling vehicle access is fundamental to ensuring security.

Advanced access management for public and private applications

With a high level of interconnectivity between the installed products, the solutions presented in this section are also adaptable to the simplest parking areas as well as multi-storey car parks or the active management of vehicle traffic. Environments that require maximum professionalism and the top performance of the Bft range. In addition, each solution offers dedicated services provided by the company to help customers before, during and after installation. The Bft Urban Mobility Access world consists of a high-tech range of products that are highly customisable according to needs.

Urban traffic management reaches new frontiers

New power in *your* hands.

Our strategic point, the differentiating and distinctive element, our DNA: U-Link, Universal Link, our exclusive new product, is a platform that allows the creation of technological ecosystems, for easy control of access points, and more. Thanks to the B-Eba cards and the Clonix receiver, this proprietary platform that characterises our products, adapts to any protocol and product, including non-Bft and also older generation devices, and is used in various sectors. Each device thus becomes smart and can be interconnected with other systems, thanks to a language that becomes universal. A cross-platform that integrates innovation, passion and ingenuity, offering new-generation performance. A unique technology (with an almost magic light beam), that saves time and allows everything to be managed easily, while enjoying an evolved world.

Advanced solutions, with unique and exclusive features. But also simple, accessible, and close to people. New-generation technologies designed to improve the lives of all: installers and those who use them.

This is us today: a company focused on the needs of the present, with an eye to the future. A professional and understanding company, able to take its partners by the arm and, thanks to a full access specialist approach, make them proceed at a dynamic pace, allowing them to always be in the forefront. A company where the technical component is supported by the power of passion, and where engineering expertise is completed by the brilliance of lively inventiveness. Because we like to listen to you, understand you, address your needs and offer new opportunities; always giving you the best, with increasingly sophisticated tools designed to enhance performance. A fast and smart technology, always accelerating: to advance at the pace of innovation and, together with you, always be a step ahead.
