ELI AC A

Electromechanical automation systems for swing gates

A complete range of in-ground non-reversible electromechanical operators for swing gates up to 4m long with 230V motors. The integrated mechanical stops for both opening and closing, allowing the option of a simple installation by reducing the need for physical stops. The magnetic limit switch system (optional) ensures the highest levels of accuracy and reliability over time in all weather conditions. The VELOCE version offers reduced waiting times on opening and closing.

Relevant features

Super fast AC35 motors: Maximum comfort. Fast opening is ideal for sites which require reduced waiting times meaning you can quickly clear busy or hazardous roads. Fast closing can help to improve security keeping the property safer from intruders.

New secondary arm: quicker and more secure attachment to the primary shaft, for a more reliable installation!

New crown produced in XECARB® (available for the models AC a 40, BT A 40): highly resistant thermal-plastic composite, widely used in sport and aerospace, allows the use on heavier gates with a longer service life.

Integrated mechanical stops: for both opening and closing, allowing the option of a simple installation by reducing the need for physical stops.

Code	Ci	Name	Description
P930131 00002	2601464	ELI VELOCE AC A35	230 V electromechanical in-ground operator for swing gates up to 3,5 m long. Magnetic limit switches - Optional
P930132 00002	2601473	ELI AC A40	Underground electromechanical operator 230 V for swing gates up to 4 m in length. Magnetic limit switches - Optional

RIGEL 6 220-230V 50/60HZ: Universal control panel with display for one or two 230V - 650+650W operators

Cp D113833 00002 - Ci 2600589 - RIGEL 6 220-230V 50/60HZ - Recommended

- Universal control panel with display for one or two 230V - 650+650W operators
- Application: universal control panel for one or two operators
- Card power supply: 230 V single-phase
- Operators power supply: 230V single-phase
- Main features: removable terminal blocks, programming and diagnostics with display, built-in four-channel receiver, electro lock, electronic torque limiter, electronic deceleration at opening and closing, a separate limit switch inputs for each motor, traffic light management, preheating hydraulic operators, weekly timer, possibility to delete a specific remote control, customization of the 4 radio channels, personalization of the duration of the delayed output, adjustable sensitivity to the obstacle.
- Main functions: automatic re-closing, separate motor working times, stays locked when closed, water hammer, 2/3/4 step logic, partial opening, fast closing, separate opening and closing
- Compatibility: RIGEL 5 - RIGEL 4 - RIGEL 3 - RIGEL N

U-LINK 2.0

AN UPDATED VERSION OF
U-LINK TO GIVE YOU EVEN
MORE FUNCTIONALITY

Scalable

You can add as many devices as you want

Intuitive

Easy to install and to use

Functional

Settings can be controlled and firmware updated remotely using dedicated applications

Practical

Works with or without an internet connection

Flexible

It allows you to create groups of interconnected products

U-Link, the exclusive **BFT** technology platform has evolved to offer improved interaction with the latest generation of technological ecosystems. Its ability to interface with all home access automation access devices has been expanded, meaning it is now a very useful tool for installers. It is also a faster communication protocol with increased security for communicating information.

It allows you to save even more time, checking everything very easily and giving you even more peace of mind.

A NEW AND EVEN MORE SECURE RADIO PROTOCOL

Secure

By transmitting data protected by a cryptographic key

U-Security is the new technology from **BFT** which incorporates encrypted rolling code thanks to the encryption key which masks the remote control code, meaning that it is impossible to clone a BFT remote control using another brand's model.

Easy

Pairing a remote control with a receiver can be done easily by scanning the QR code and using the dedicated app

The functions of the **Er Ready** system are incorporated and a new procedure is also available for programming remote controls by scanning a QR CODE and using a special app. All products featuring this technology are REPLAY, so they can transmit the code to another BFT remote control using a combination of keys.

Universal

The radio protocol is also compatible with the previous generation of receivers
