ALENA

Control panels

Juhtpaneel koos dip-lülitite ja potentsiomeetritega ühe või kahe 230 V / 400+400 W kaituri jaoks, mis on mõeldud tiibväravate ja tööstuslike voldikuste jaoks, koos tundlike servade haldamise ja turvasisenemise kontrollimise võimalusega. See saab juhtida värava aeglustamist nii avamisel kui ka sulgemisel. See saab ka juhtida ühendust EBP elektrilise lukuga või ECB-ga (lisaks ME-kaardiga). Raadiovastuvõtjas on olemas jooksva koodi tehnoloogia. Klemmiplaadid on värvilised ja neid on juhtmete ühendamise hõlbustamiseks võimalik eemaldada.
