Harness wire color legend:

Red & Black: Power supply, 12 to 24 V AC or DC

Blue & Yellow : Channel 1 normally open output

Green & Orange: Channel 2 normally open output

TRANSMITTER INDIVIDUALIZATION:

- Open up the transmitter by prying on corner as illustrated.
- Change the transmitter code by moving the switches on the dip-switch bank.
- Carefully close transmitter by snapping enclosure back in place.

TRANSMITTER PROGRAMMING:

- Press and hold the receiver channel button until LED lights on (**P1** for channel 1; **P2** for channel 2).
- Press button on transmitter to be programmed.

RECEIVER MEMORY DELETION:

- Press and hold **P1**.
- WITHOUT RELEASING **P1**, when the LED lights up, press and hold **P2** for 10 seconds.
- Release both buttons. LED will flash 6 times indicating memory deletion.
