## Catalogue 2023/2024

Be ahead

# From 1967 to date: 

fifty years of Bft solutions.

## חाना

## 

## A place for everyone.

We have launched two specific business units where we develop and market access automation: Residential \& Industrial, for businesses and private dwellings, and Commercial \& Urban, where we handle infrastructure for large communities, typically with high numbers of visitors and vehicles, which require road barriers,
bollards and automatic doors.

In both situations, we satisfy the demands of customers,
who are seeking a trusted and competent partner able
to develop intelligent and technologically advanced
systems which are simple and intuitive in everyday use.

## General index

From 1967 to date: fifty years of Bft solutions. ..... 2
General contents ..... 4

## EasyA>:S

EASY CONNECT. EASY ACCESS.

## EASY TO CONNECT

EASY TO SET UP
FOR INSTALLERS

## $\stackrel{\otimes}{2}$ U-LINK2.0

# AN UPDATED VERSION OF U-LINK TO GIVE YOU EVEN MORE FUNCTIONALITY 

$\infty \quad \rightarrow$ Scalable You can add as many devices as you want

> Flexible
It allows you to create groups of interconnected products

U-Link, the exclusive BFT technology platform has evolved to offer improved interaction with the latest generation of technological ecosystems. Its ability to interface with all home access automation access devices has been expanded, meaning it is now a very useful tool for installers. It is also a faster communication protocol with increased security for communicating information.

It allows you to save even more time, checking everything very easily and giving you even more peace of mind.

## A NEW AND EVEN <br> MORE SECURE RADIO PROTOCOL

## Secure

By transmitting data protected by a cryptographic key

## Easy

Pairing a remote control with a receiver can be done easily by scanning the QR code and using the dedicated app

## Universal

The radio protocol is also compatible with the previous generation of receivers

U-Security is the new technology from BFT which incorporates encrypted rolling code thanks to the encryption key which masks the remote control code, meaning that it is impossible to clone a BFT remote control using another brand's model.

The functions of the Er Ready system are incorporated and a new procedure is also available for programming remote controls by scanning a QR CODE and using a special app. All products featuring this technology are REPLAY, so they can transmit the code to another BFT remote control using a combination of keys.

# With Bft Easy Set the installation of an automation system for swing gates has never been easier! 

Thanks to the exclusive "Bft Easy Set" app, with a few simple steps, you can automatically obtain the installation dimensions of the brackets for the swing gate operators.
The application allows you to choose the opening angle of the gate according to the position of the brackets.
Available soon for your Android or iOS smartphone!

1. Choose your operator for swing gates

2. Enter the basic 3. The App automatically measurements of the gate calculates the position and the desired opening angle dimensions of the brackets

# BFT, technologies, instruments, protocols <br> The adoption of exclusive and safe technologies and protocols ensures optimum performance at all times and makes BFT automation systems the essence of innovation, quality and reliability. 

## U-Link

An evolution of the U-Link communication protocol, U-Link 2.0 retains robust data protection, the open approach which allows it to adapt to numerous different communication languages whilst its scalability means there are no limits to the objects (B-eba) connected to the network. At the same time, it has evolved to allow information to be sent but also receive from the control unit, creating bi-directional communication. It also supports OTA technology allowing the firmware to be updated remotely. With this newer, enhanced performance protocol, the control unit can be programmed using a dedicated app and a lot of the information can be managed either locally (via Bluetooth) or remotely (wifi/GSM), improving the user experience.

## U-Security

U-Security is a new technology from BFT which, in addition to incorporating a new encrypted rolling code transmission, also incorporates the functionalities of the Er-Ready system and introduces a new procedure for programming BFT remote controls by scanning a QR code. The new rolling code system has an encryption key which masks the code and prevents the BFT remote controls from being cloned by third-party models. All products which have this technology integrate the coding system to directly clone remote controls (Er-Ready) and are therefore all REPLAY. In addition, with U-Security it is also possible to add remote controls to a BFT receiver and program them using the QR code which is printed on the cover of each Mitto C, using the dedicated app.

## U-Link2.0

An evolution of the U-Link communication protocol, U-Link 2.0 retains robust data protection, the open approach which allows it to adapt to numerous different communication languages whilst its scalability means there are no limits to the objects (B-eba) connected to the network. At the same time, it has evolved to allow information to be sent but also receive from the control unit, creating bi-directional communication. It also supports OTA technology allowing the firmware to be updated remotely. With this newer, enhanced performance protocol, the control unit can be programmed using a dedicated app and a lot of the information can be managed either locally (via Bluetooth) or remotely (wif/GSM), improving the user experience.

## Dynamic Path Tracking

The thrust required to operate safely. A smart torque management system based on the microprocessor technology of BFT control units. Acquiring data from several indicators, it updates the level of thrust required to perform the operation. D-Track also facilitates the installer in providing for the certifications required by law. Conventional control units do not "read" the exact position of the gate and consequently apply constant thrust levels, without ensuring stable sensitivity during the opening and closing operations. BFT control devices record the slightest variation in the gate or door force, for example due to differences in temperature or wear, constantly supplying the optimum torque to the motor. A conventional control unit could not detect these thrust variations, which would result in it indicating the presence of non-existent obstacles. The BFT system thus guarantees the maximum safety and perfect functioning of the equipment, no matter what the climactic and temperature conditions and degree of mechanical wear

## Nf Certification

Quality certification. Products with NF certification are periodically checked by independent auditing firms responsible for verifying the quality of each article. The verification criteria vary depending on the product and also include analysis of the different production sites. By purchasing an NF certified product you are assured that it meets the current standards and has undergone stringent compliance tests.

## Er-Ready

The new coding system for direct cloning of remote controls Based on microprocessor technology, this system allows the cloning of any MITTO remote control in a MITTO REPLAY remote control. In fact, the first remote control "teaches" the second one the correct code which is automatically saved in the receiver the first time it is used. Everything occurs at the highest levels of security thanks to the use of the Rolling Code safe transmission system.

## 24 V

A precise, safe and reliable technology Bft 24 V technology ensures optimum performance with a precise adjustment of slowdown in closing and opening. Safety is another key aspect, ensuring the immediate stopping and reversal of movement in the presence of obstacles. The efficiency of the technology is a guarantee of the product's reliability.

## Ecosol

A system powered by solar energy and suitable for all low-voltage installations. Ecosol is not just a technology attentive to the environment, but also a practical solution for doors and gates that are hard to reach from the mains power supply. Thanks to compatibility with all new and old 24 V systems, it can be installed in any situation. Ecosol, a clean, renewable and endless charge.

## Rolling Code

For safe transmission. BFT transmitters use a rolling code system that manages the commands in a completely secure way and prevents any type of external violation. When a transmitter key is pressed the command is sent to the control unit with a different code each time, identifiable only by the receiver and accepted only once. The algorithm generated then prevents the reproduction of the code.

## Inverter

Motor rotation constantly under control The inverter is an electronic device allowing motor rotation speed to be controlled at any moment, ensuring safety and reliability of the installation, and even extending its life. This is because the inverter reduces the stresses on mechanical parts, subjecting them to less stress. The system also allows management of automation opening and closing times.

## Reduction Unit In Oil Bath

The device included in a specific range of Bft barriers, offering great durability in being maintenance free; it ensures extreme quietness and irreversibility of movement.

## Crank Handle System

Together with irreversibility of the reduction unit, this device included in a specific range Bft barriers provides intrinsic anti-vandal protection, preventing unauthorised opening of the gate.

## Inductive Encoder

A contactless high-resolution device for detecting obstacles. It ensures rapid reversing of motion and improves smoothness of overall movement during acceleration and slowdown.

## Encoder

## Three-Phase Induction Motor

This device, included in a specific range of Bft barriers, allows the motor to be maintenance-free and offers extreme reliability and quietness. It can also be used in hazardous areas, as it does not produce sparks.

## Easily Accessed Hydraulic Pump

This solution, included in the range of Bft hydraulic bollards, allows quick maintenance without the use of a shaft lifting crane.
Easy

## Certification Iwa 14-1:2103 V/7200 (N3C)/80/90

Anti-terrorism certification The X-Pass B 330/1200 bollard has obtained Iwa certification, classifying it as an anti-terrorism device. In the crash test, one of these bollards stopped a 7,200 kg heavy vehicle travelling at a speed of 80 kph . A perfect solution to protect sensitive buildings, such as barracks, banks and embassies, from intrusion by potentially dangerous vehicles. The test was carried out by the English company Mira, specialised in innovations in the world of engineering and product testing.

EFO

## Efo

A device applicable to hydraulic bollards, allowing rapid rising of the shaft (about 3 times faster than the standard speeds), essential in case of emergency. The device consists of a high pressure reservoir which, when activated, gives the hydraulic pump additional thrust. Once used, the system is automatically reinstated, without requiring maintenance.

## Ee Link

For fast and safe programming. EELINK is a system developed by BFT which, by means of connection to handheld programmers (Unipro, Uniradio and Proxima), makes it possible to transfer data from automatic systems to PCs and vice versa. Thus EEdbase or U-base, the databases of the information stored in the installed systems, are constantly updated. Thanks to this software it possible to associate the necessary personal details with each system: owner's address and details, name of maintenance technician, names of every remote control holder, etc. With EElink, just press a few buttons to easily manage the customer base or preventive maintenance. Even operations that were once complex become easier: for example, reconfiguring the control unit or the radio receiver in case of replacement or the setup of a control panel, starting from a standard or custom configuration.

## Inverter With Three-Phase Induction Motor

Allows precise control and management of bar/boom speed in a specific range of Bft barriers and also provides excellent dynamic performance in acceleration and slowdown, ensuring extreme quietness.

## Reading Of Passive Tag

Tuva is a medium range UHF passive tag reading system that can be integrated in a parking system. The Tuva antenna, installed near the entry and exit posts, allows motorists with special adhesive tags on their windscreens to enter and exit the car park quickly, without having to show anything at the post.

## Car Number-Plate Reading

Nea
NEA is a vehicle number-plate reading system that can be integrated in parking systems. The camera, installed near the entry and exit posts, allows vehicles with registered number-plate to enter and exit the car park quickly, without having to show anything at the post. The use of the plate does not require specific physical supports, thereby offering maximum flexibility.

## Silentech

Silentech

## Legend of uses

Legend of applications for BFT products

## Home Access Automation

Full Access Specialist: that's what we have become, starting from automation in the residential context, a traditional area for Bft , which can count on 30 years of technological innovations.

## Building Access Automation

A range focused on providing the control and protection of points of access to public and private structures.

## Urban Access Automation

Advanced parking systems, barriers and bollards integrated through the use of software dedicated to Urban Traffic Management: this is the result of the most innovative research made in Bft.

## Some solutions of the Home Access Automation, Building

Motorway toll-gate - A boom that withstands impacts
Faults in the barriers are often due to accidental impacts against the boom. Hence the Bft solution that withstands impacts and quickly returns operational.

Thanks to the hinged boom release mechanism, the barrier minimises damage to the device in case of impact, thus allowing rapid reinstatement of the automation. The entire toll-gate barrier system is controlled remotely from a single computer with the U-BASE 2 software which allows prompt and precise diagnostics of the barriers included in the U-Link network.

## - ADVANTAGES

- The boom will not damaged in case of impact
- Quickly resettable system
- Centralised remote control
- Barrier diagnostics

## Access Automation and Urban Access Automation worlds.

New
Bft, cutting-edge products

PHOBOS BT B35 VELOCE

## KUSTOS BT B

## PHOBOS BT B35 VELOCE

Rat operator for swing gates for FAs residential use: it guarantees ease of use and safety against intrusion thanks to opening and closing times reduced to a minimum. Gate up to 3 m long and weighing 450 kg . Obstacle detection: the management and control system of the D-Track pair ensures maximum safety for people and property, as well as making it easier to certify the system. Installation is easy and fast thanks to the magnetic limit switch at the top of the motor and the exclusive function that helps the installer to position it correctly using the motor's vibration.

## THALIA BT A80 DUO

## THALIA BT A8O DUO

splay or one or two 24 V electromechanical operators used on 230 V swing gates. There are two power modules. which are interchangeable and can operate all motors. The radio receiver is incorporated and the memory of the remote controls is removable and expandable. It has an anti-crushing system based on D-Track technology, it controls the slowing down when opening and closing and has an electronic self-learning function. The main functions include automatic closing, fast closing, partial opening and hold-to-run operation. This panel can be programmed using Bluetooth or remotely via wifi/GSM using a dedicated app. The product complies with the new energy efficiency regulations and therefore has a power consumption on standby of less than 0.5 W .

## ZARA BT A80

## ZARA BT A80

解 24 V operators for swing gates Application: control panel for one or two 24 V operators for swing gates Board power supply: 230 V single-phase. Operators power supply: 24 VDC, max. 180 W for each operator. Main functions: automatic closing, functions: automatic closing, fast closing, hold-to-run operation Compatibility: LIBRA C MA. LIBRA, LIBRA R, LIBRA MA R Main features: removable terminal block with new colour-coding, simplified dip switch programming and built in receiver, anti-crush system with D-Track technology, slowdown during opening and closing and electronic Learning, pedestrian control by remote control only, electronic lock management. The product complies with the new energy efficiency regulations and therefore has a power consumption on standby of less than 0.5 W .

EasyAXS connectivity modules

## EasyAXS connectivity modules

With the EasyAX5 plug \& play connectivity modules, BFT solutions are quick and easy to connect. With EasyAXS you can choose the connectivity solution to suit your customers' needs: just select the Wifi or Mobile module to connect your automation. No need to worry about the distances between the mobile connectivity module and its built-in 4G SIM: no more managing any connections or worrying about the wifi network. All of the modules also offer Bluetooth connectivity, allowing you to connect directly from your smartphone even without an Internet connection.

EasyAXS B-EBA MOBILE + External Antenna + SIM KIT

EasyAXS B-EBA MOBILE + External Antenna + SIM KIT
4G Mobile connectivity module fitted with external antenna and
5 IM Data built-in with 1GB of data included. The use of the EasyAX5 Mobile connectivity module allows a BFT (U-Link and U-Link2.0) automation to be easily linked to the TaHoma app even in the absence of a wifi network. Furthermore, thanks to the built-in Bluetooth technology, when the module is installed with a U-Link2.0 control unit, this means parameters, logics and radio receivers can be programmed directly from a smartphone thanks to the EasyAXS App.

## B EBA WI-FI GATEWAY

## B EBA WI-FI GATEWAY

Expansion card for connecting a U-Link device to a domestic wif network. Connected operators can be controlled, even remotely. using the U-Control application available for Android and iOS smartphones.

MITTO COOL

## MITTO COOL

Range of remote controls comprising two and four-button models, all with red pin LEDS, available in four colours and with the option of customising the front part. Supports the new U-Security technology and are powered by a
widely available 3 V pin battery.

MITTO STYLE

## MITTO STYLE

Four-channel black remote control with red diffused light LEDs. screen printed logo on the front cover and keyring loop with metal insert. Supports the new U-Security technology and is powered by a widely available 3 V coin battery.

BOTTICELLI SMART BT A850 VERDE

## BOTTICELLI SMART BT A850 VERDE

clectomechanical operators for intensive/very intensive use designed for automation of sectional garage doors. Features a very compact design, suitable for installation in any situation, thanks to the wide range of tracks available in various lengths. The control unit and limit switch with mechanical stop encoder are incorporated in the operator and rail respectively. The intensity of use makes them suitable for any type of installation, both residential and municipal. The quick Set-Up function from the ground makes installation fast and easy. The fast opening speed minimises waiting times and maximises comfort for the end user. The exclusive anti-intruder function (SMART models) secures the garage from unwanted intrusion. The new GREEN models are environmentally friendly, drastically reduce emissions and energy requirements, thanks to a consumption on standby lower than TW and the total use of recyclable material.

## ICARO VELOCE SMART AC A

## ICARO VELOCE SMART AC A

ast extremely robust and high-performance thanks to oil bath transmission. Suitable for sliding gates weighing up to 1.000 kg and speed without load $25 \mathrm{~m} / \mathrm{min}$ or up to $2,000 \mathrm{~kg}$ and speed without load $18 \mathrm{~m} / \mathrm{min}$. The maximum speed actually achievable by the gate panel depends on the condition of the gate. Operator fitted with electromechanical limit switch. Torque control thanks to D-Track technology and encoder for the highest possible precision of movement. Control unit for communication with U-Link protocol and with tamper-proof function. The ideal solution for situations which require fast operating speeds, reduced waiting times and high levels of security.

E5 BT A

E5 BT A
2. pedestrian and vehicular access, for use in homes and apartment buildings. Its small size means it can be installed on small pillars and columns (minimum width required 8cm). The slide arm option means constraints such as walls and obstacles close to the operator can be overcome. The limit switch function is regulated by the absolute encoder. The safety of the operator is guaranteed thanks to the D-track system which precisely determines the position and force with which the gate moves, using the friction inside the operator and the new articulated and slide arms with anti-shear design.

EBP A

EBP A
Vertical drop-down electric lock, for automated swinging gates. The product is an important accessory for completing the installation in order to safeguard gear motors installed on large gates. It is also an essential element for locking the leaves when gates are equipped with reversible operators. Available in $230 \mathrm{~V}, 120 \mathrm{~V}$ and in the new 24 V version, it is directly connected to the control unit. The wide operating temperature range of $-20^{\circ} \mathrm{C}+55^{\circ} \mathrm{C}$ allows it to be used in a large number of applications.

## GIOTTO ULTRA 36

## GIOTTO ULTRA 36

Range of 24 V electromechanical barriers with opening speeds of between 2.2 and 4 seconds, depending on the length of the bar. Ideal for installation in large car parks. vehicle access points and industrial gates between 2 and 6 m wide. High degree of movement control and impact resistance via encoder. Integrated control unit with U-Link connectivity. Same appearance as Maxima U36 barrier. Wide range of accessories for any type of application.

MURA A30

## MURA A3O

shotocells, ideal solution in a stylish environment. Due to their small size and ability to adjust the beam means easy installation. Extended main supply range of $12-33 \mathrm{Vac}$ and $15-35 \mathrm{Vdc}$. Nominal range 30 metres.

## Interconnectivity

EasyAXS is the new connectivity solution which boosts the potential of BFT products and services to make access automations smarter and easier to use for both installers and end users. BFT solutions are a great step forward for the access sector. Installers and end users can enjoy from connectivity benefits through the reliable, secure and convenient system.

With the EasyAXS app, configuring your automation is even quicker and easier. Say goodbye to small displays and long, tedious manual tasks: the whole configuration process can be performed intuitively, quickly and comfortably on your smartphone.

## Relevant features

EASY CONFIGURATION: Initial configuration of the unit is quick and easy using the guided procedure.

FULL CONTROL FROM YOUR SMARTPHONE: Check and modify all of the unit's parameters and settings.

EASY MANAGEMENT OF REMOTE CONTROLS BY OR CODE: Add and manage the functions of the remote controls from the app.

OUCK AND EASY OPERATIONS: Quick and secure operations using the diagnostics available in the app.

Simple and intuitive, the TaHoma app from Somfy is the best solution for allowing your customers to access their home in a smarter way. At home or remotely, they can control and check their entrances from their smartphone, any time, any place.

## Relevant features

INSTANT REGISTRATION: Easy registration using the app without having to use external gateways (TaHoma Switch).

REMOTE CONTROL OF THE AUTOMATION: Remotely send Open/Close/Stop/Pedestrian commands from the TaHoma app.

REAL-TIME MONITORING: The opening status can be checked in real time.

ALWAYS UP-TO-DATE: Notifications about the status of the automation and regular updates via the TaHoma app.

VOICE CONTROL: Manage the automation using Google Assistant or Amazon Alexa.

With the EasyAXS plug \& play connectivity modules, BFT solutions are quick and easy to connect. With EasyAXS you can choose the connectivity solution to suit your customers' needs: just select the Wifi or Mobile module to connect your automation. No need to worry about the distances between the mobile connectivity module and its built-in 4G SIM: no more managing any connections or worrying about the wifi network. All of the modules also offer Bluetooth connectivity, allowing you to connect directly from your smartphone even without an Internet connection.
(101) $\frac{\mathbf{C p}}{\text { PasyAXS B-EBA }}$ MOBILE + External Antenna + SIM KIT

4G Mobile connectivity module fitted with external antenna and SIM Data built-in with 1GB of data included. The use of the EasyAXS Mobile connectivity module allows a BFT (U-Link and U-Link2.0) automation to be easily linked to the TaHoma app even in the absence of a wifi network. Furthermore, thanks to the built-in Bluetooth technology, when the module is installed with a U-Link2.0 control unit, this means parameters, logics and radio receivers can be programmed directly from a smartphone thanks to the EasyAXS App.

## Cp P111816-Ci 2614967 <br> EasyAXS B-EBA Wifi eVo

Wifi connectivity module with built-in antenna. The use of EasyAXS Wifi connectivity allows a BFT automation (U-Link e U-Link2.0) to be easily linked to the TaHoma app via a home wifi network. Furthermore, thanks to the built-in Bluetooth technology, when the module is installed with a U-Link2.0 control unit, this means parameters, logics and radio receivers can be programmed directly from a smartphone thanks to the EasyAXS App.

## Cp 1111814 - Ci 2613419 EasyAXS B-EBA Wifi EVO + External Antenna KIT

Wifi connectivity module with external antenna. The use of EasyAXS Wifi connectivity allows a BFT automation (U-Link e U-Link2.0) to be easily linked to the TaHoma app via a home wifi network. Furthermore, thanks to the built-in Bluetooth technology, when the module is installed with a U-Link2.0 control unit, this means parameters, logics and radio receivers can be programmed directly from a smartphone thanks to the EasyAXS App.

Designed according to the installer's specific needs for easy management and maintenance of the systems, the innovative U-Base software features an immediate and intuitive user interface and can operate on-line, updating data directly on connected systems or off-line operating on the information present in the local database of the computer on which it is installed.
For operation, the system requires the installation of a B EBA gateway expansion card connected to the control unit and allows interfacing even wirelessly or remotely with Bft control units (U-Link compatible).
The main functions include the possibility of displaying and editing control unit parameters and logics, as well as viewing the list of recorded alarms. Through an immediate graphic interface, also all the functions and parameters of the motors are monitored, displaying the threshold current, absorbed current and the position of the operator in real-time.

## Relevant features

The software provides user friendly management of even very complex networks

All functions and parameters are now easy to review and edit on the PC. The GUI also allows the user to review speed and absorption curves in real time.

THALIA BT A8O DUO：Control panel for one or two 24 V operators for swing gates，for highly complex systems．The product complies 飞es（2）nel with the new energy efficiency regulations．

## Cp D114215 00002 －Ci 2614324 －THALIA BT A8O DUO－Recommended

－Control panel for one or two 24V operators for swing gates，for highly complex systems．

－Application：control panel for one or two 24 V operators for swing gates
－Card power supply： 230 V single－phase
－Operators power supply： 24 Vdc 240 W max each operator
－Main features：removable terminal blocks with new standard colour－coding，simplified scenario－based programming with display and incorporated receiver，D－Track anti－crushing system ，slowdown during opening and closing and electronic self－learning
－Main features：automatic closing，rapid closing，partial opening，operation with deadman feature，direct connection powered solenoid lock and electromagnet，direct connection edge 8K2．
－Compatibility：LIBRA C MA，LIBRA C LX，LIBRA，LIBRA R，LIBRA MA R

## VITAL ACCESSORIES

（8）（8）

Cp 011421800002 －Ci 2614325
U－Link EasyAXS ZARA BT A80

Control panel with dip switches and potentiometers for one or two 24 V operators for swing gates．The product complies with the new energy efficiency regulations．
RECOMMENDED ACCESSORIES

Inputs and outputs expansion card for Thalia BT A card． Includes two command inputs and four non－programmable security inputs．
（1ew $\frac{\mathbf{C p}}{\mathbf{A P S}} \mathrm{N} 35008$－ $\mathbf{C i} 2614979$
APSP
Adapter kit for PHOBOS BT A bracket．

Cp $N 735003$
Ci 2601367

RIGEL 6 220-230V 50/60HZ: Universal control panel with display for one or two 230V - 650+650W operators
Cp D113833 00002 - Ci 2600589 - RIGEL 6 220-230V 50/60HZ - Recommended

- Universal control panel with display for one or two 230V - 650+650W operators
- Application: universal control panel for one or two operators

- Card power supply: 230 V single-phase
- Operators power supply: 230V single-phase
- Main features: removable terminal blocks, programming and diagnostics with display, built-in four-channel receiver, electro lock, electronic torque limiter, electronic deceleration at opening and closing, a separate limit switch inputs for each motor, traffic light management, preheating hydraulic operators, weekly timer, possibility to delete a specific remote control, customization of the 4 radio channels, personalization of the duration of the delayed output, adjustable sensitivity to the obstacle.
- Main functions: automatic re-closing, separate motor working times, stays locked when closed, water hammer, 2/3/4 step logic, partial opening, fast closing, separate opening and closing
- Compatibility: RIGEL 5 - RIGEL 4 - RIGEL 3 - RIGEL N

Full range of electromechanical pistons for residential and collective use suitable for swing gates to 4 metres long and weighing up to 700 kg . The new KUSTOS BT B operators have been created to deliver a high degree of protection for the motor, including in particularly dusty locations, thanks to the covered worm screw. Obstacle detection: the management and control system of the D-Track pair maximises safety for people and property, as well as facilitating certification of the system. Installation is quick and easy thanks to the magnetic limit switches at the top of the motor, the exclusive function that assists the installer with correct positioning using the motor's vibration, and the integrated mechanical stops.

THALIA BT A80 DUO: Control panel for one or two 24 V operators for swing gates, for highly complex systems. The product complies (8) $\mathrm{B}^{20}$ with the new energy efficiency regulations.
Cp D114215 00002 - Ci 2614324 - THALIA BT A80 DUO - Recommended

- Control panel for one or two 24 V operators for swing gates, for highly complex systems.
- Application: control panel for one or two 24 V operators for swing gates
- Card power supply: 230 V single-phase
- Operators power supply: 24Vac 240W max each operator
- Main features: removable terminal blocks with new standard colour-coding, simplified scenario-based programming with display and incorporated receiver, D-Track anti-crushing system , slowdown during opening and closing and electronic self-learning
- Main features: automatic closing, rapid closing, partial opening, operation with deadman feature, direct connection powered solenoid lock and electromagnet, direct connection edge 8K2
- Compatibility: LIBRA C MA, LIBRA C LX, LIBRA, LIBRA R, LIBRA MA R

VITAL ACCES5ORIES

Thanks to the structure made of die-cast aluminium shells and to the high quality materials, such as the worm screw transmission system and the bronze crown, the Athos operator range ensures maximum strength, reliability and resistance over time. Quick to install, Athos also ensures maximum comfort, thanks to fast opening and closing combined with extremely silent operation. Non-reversible operator for residential use; the emergency manoeuvre is always easy thanks to unlocking with triangular key.

ALENA SW2: Control panel with slow-down, dip switches and potentiometers for one or two $230 \mathrm{~V} 400 \mathrm{~W}+400 \mathrm{~W}$, operators for swing gates and industrial folding doors
Cp D113811 00004 - Cil 2607514 - ALENA SW2 - Recommended

- Application: control panel for one or two operators for swing gates
- Card power supply: 230 V single-phase

- Operators power supply: 230 V single-phase 400 W max each operator
- Main features: programming of trimmer and dip-switch, removable terminal block with standard colouring, integrated radio receiver, remote controlled pedestrian opening. Soft opening and closing (only with electromechanical motor), management of resistive safety edges 8K2/contact, management of verified safety devices, management of electronic locks, electronic control of motor torque (only with electromechanical motor), pressure surge when opening.
- Main functions: stays locked when closed, 3/4 step logic, partial opening, fast closing and self-diagnostics
- Compatibility: ALTAIR and ARIES

## DIMENSION (mm)

24 V reversible electromechanical operator for swing gates for pedestrian and vehicular access, for use in homes and apartment buildings. Its small size means it can be installed on small pillars and columns (minimum width required 8 cm ). The slide arm option means constraints such as walls and obstacles close to the operator can be overcome. The limit switch function is regulated by the absolute encoder. The safety of the operator is guaranteed thanks to the D-track system which precisely determines the position and force with which the gate moves, using the friction inside the operator and the new articulated and slide arms with anti-shear design.

Cp D114215 00002 - Ci 2614324 - THALIA BT A80 DUO - Recommended

- Control panel for one or two 24V operators for swing gates, for highly complex systems.

- Application: control panel for one or two 24 V operators for swing gates
- Card power supply: 230 V single-phase
- Operators power supply: 24Vac 240W max each operator
- Main features: removable terminal blocks with new standard colour-coding, simplified scenario-based programming with display and
incorporated receiver, D-Track anti-crushing system , slowdown during opening and closing and electronic self-learning
- Main features: automatic closing, rapid closing, partial opening, operation with deadman feature, direct connection powered solenoid lock and electromagnet, direct connection edge 8K2.
- Compatibility: LIBRA C MA, LIBRA C LX, LIBRA, LIBRA R, LIBRA MA R

BFE

Complete range of low voltage hydraulic pistons for very intensive use, suitable for any type of residential, industrial or multi-residence application.
Compact and sturdy, capable of automating swing gate leaves up to 5 metres wide and weighing up to 800 kg .
Anti-crushing safety guaranteed thanks to the exclusive D-Track system

RIGEL 6 220-230V 50/60HZ: Universal control panel with display for one or two 230V - 650+650W operators

## Cp D113833 00002 - Ci 2600589 - RIGEL 6 220-230V 50/60HZ - Recommended

- Universal control panel with display for one or two 230V - 650+650W operators
- Application: universal control panel for one or two operators
- Card power supply: 230 V single-phase

Operators power supply: 230V single-phase

- Main features: removable terminal blocks, programming and diagnostics with display, built-in four-channel receiver, electro lock, electronic torque limiter, electronic deceleration at opening and closing, a separate limit switch inputs for each motor, traffic light management, preheating hydraulic operators, weekly timer, possibility to delete a specific remote control, customization of the 4 radio channels, personalization of the duration of the delayed output, adjustable sensitivity to the obstacle.
- Main functions: automatic re-closing, separate motor working times, stays locked when closed, water hammer, 2/3/4 step logic, partial opening, fast closing, separate opening and closing
- Compatibility: RIGEL 5 - RIGEL 4 - RIGEL 3 - RIGEL N

Adjustable front mounting bracket for ORO and LUX

## Cp N735003 - Ci 2601367 <br> SFR-L B

Adjustable wall bracket, long, for linear swing-gate motors (excluding P4.5-P7)
Cp N735003 00001 - $\mathbf{C i} 2601392$

## SFR-L B - COMPLETE

Adjustable wall bracket, long, for linear swing-gate motors (excluding P4.5-P7), with flat bracket
Cp 0111013 - $\mathbf{C i} 2607261$
ME
Control board for 12 Vac solenoid lock for 230 V automation systems

Cp P111782 - Ci 2601411
COMPACTA A20-180
Pair of photocells adjustable $180^{\circ}$ horizontally. 20 metre range. 12-33 VAC/15-35 VDC power supply.
Cp 111409300002 - $\mathbf{C i} 2607538$
RADIUS LED AC A R1
Flashing light with incorporated antenna for motors with 230 V power supply.
(1910) Cp D112306 -Ci 2614118

MITTS COOL CZ
2-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Blue.

Cp 11368000002 - $\mathbf{C i} 2600108$

## ALPHA SD

Universal control panel with potentiometers for one 230V/500W single-phase operator

Cp N735002- Ci 2601324
STR B
Adjustable wall bracket, short, for linear swing-gate motors (excluding P4.5-P7)
Cp N735002 00001 - $\mathbf{C i} 2601273$
SF B - COMPLETE
Adjustable wall bracket, short, for linear swing-gate motors (excluding P4.5-P7), with flat bracket
Cp D730178-位 2600090
PL
Anchor plate for attaching the rear mountings to masonry pillars for LUX, ORO, and PHOBOS operators.

Cp 0610180 - Ci 2600598
LS
Triangular release key $l=52 \mathrm{~mm}$
Cp P123032 00001 - $\mathbf{C i} 2613516$ EBP AC A 230V 50/60 HZ

230 V vertical electric lock.
(new Cp P123032 00002 - $\mathbf{C i} 2613517$ EDP AC A $120 \mathrm{~V} 50 / 60 \mathrm{~Hz}$

120 V vertical electric lock.

## Cp D112318- Ci 2614120

MITTS COOL CA
4-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Blue.

BFE

Extremely sturdy and reliable hydraulic operators for industrial and condominium use. They can automate swing gate leaves up to 7 m wide and weighing up to 500 kg .
Smooth, silent gate movements are guaranteed by the extremely high-performance hydraulic system and the closing slowdown. Maximum precision in traction and thrust force control is guaranteed by the by-pass valve system.

BFL

Low voltage hydraulic operator for very intensive use, suitable for any type of residential, industrial or multi-residence application. Compact and sturdy, they can automate 5 wing gate leaves up to 2.5 m wide and weighing up to 800 kg .
Fitted with mechanical stops and virtual encoder, guaranteeing maximum anti-crushing safety thanks to the electronic slowdown and D-Track system

## Description

Low voltage, in-ground irreversible hydraulic operator for hinged leaves up to $2,5 \mathrm{~m}$. weight 800 kg . D-Track

THALIA P: Control panel for one or two 24 V electromechanical and hydraulic operators for swing gates with electric lock management, for highly complex systems
Cp D113747 00002 - Ci 2600583 - THALIA P - Recommended

- Card power supply: 230 V single-phase
- Operators power supply: 24Vdc 240W max each operator
- Main features: removable terminal blocks with new standard colour-coding, simplified scenario-based programming with display and incorporated dual channel receiver, D-Track anti-crushing system , slowdown during opening and closing and electronic self-learning
- Main features: automatic closing, rapid closing, partial opening, operation with deadman feature, direct connection powered solenoid lock and electromagnet, direct connection edge 8K2.
- Application: display panel for 1 or 224 V operators
- Compatibility: LIBRA, LIBRA R, LIBRA MA R

## VITAL ACCESSORIES

Control panel for one or two 24 V operators for swing gates, for highly complex systems. The product complies with the new energy efficiency regulations.

RIGEL 6 220-230V 50/60HZ: Universal control panel with display for one or two 230V-650+650W operators

## Cp D113833 00002 - Ci 2600589 - RIGEL 6 220-230V 50/60HZ - Recommended

- Universal control panel with display for one or two 230V - 650+650W operators
- Application: universal control panel for one or two operators
- Card power supply: 230 V single-phase

- Operators power supply: 230V single-phase
- Main features: removable terminal blocks, programming and diagnostics with display, built-in four-channel receiver, electro lock, electronic torque limiter, electronic deceleration at opening and closing, a separate limit switch inputs for each motor, traffic light management, preheating hydraulic operators, weekly timer, possibility to delete a specific remote control, customization of the 4 radio channels, personalization of the duration of the delayed output, adjustable sensitivity to the obstacle.
- Main functions: automatic re-closing, separate motor working times, stays locked when closed, water hammer, 2/3/4 step logic, partial opening, fast closing, separate opening and closing
- Compatibility: RIGEL 5 - RIGEL 4 - RIGEL 3 - RIGEL N

HAMAL 400: Control panel with trimmer and dip switch for one operator, 230V - 70W
HAMAL 400 - Cp 170000810001 - Ci 2610700 - Built-in - (Spare part code, available for order through the Technical Support network)

- Control panel with trimmer and dip switch for one operator, 230V - 70W
- Application: built-in control unit for one 24 V operator for sliding gates
- Card power supply: 230 V single-phase
- Operator power supply: 24 V 80 W
- Main features: removable terminal blocks with new standard colour-coding, dip-switch programming and potentiometers, incorporated dual channel receiver, D-Track anti-crushing system, slowdown during opening and closing
- Principal functions: automatic closing, pedestrian opening with remote control only, 8k2 obstruction sensor input, rapid closure

HAMAL 600: Control panel with trimmer and dip switch for one operator, 230V - 70W
HAMAL 600 - Cp 170000910001 - Ci 2610702 - Built-in - (Spare part code, available for order through the Technical Support network)

- Control panel with trimmer and dip switch for one operator, 230V - 70W
- Application: built-in control unit for one 24 V operator for sliding gates
- Card power supply: 230 V single-phase
- Operator power supply: 24 V 80 W
- Main features: removable terminal blocks with new standard colour-coding, dip-5witch programming and potentiometers, incorporated dual channel receiver, D-Track anti-crushing system, slowdown during opening and closing
- Principal functions: automatic closing, pedestrian opening with remote control only, 8k2 obstruction sensor input, rapid closure

## SHYRA AC: SHYRA AC control panel

SHYRA AC - Cp I700044 10001 - Ci 2610718 - Built-in - (Spare part code, available for order through the Technical Support network)

- Main features: removable terminal blocks, settings controlled by potentiometers, LED-based fault reporting and incorporated dual channel receiver, two safety verified inputs, one of wich dedicated to 8k2 safety edge.
- Control panel for DEIMOS AC A8OO sliding gate operator range.
- Panel power supply: 230 V, single-phase
- Operator power supply: 230 V single-phase, max. 500 W
- Main functions: pedestrian opening (only by remote control), quick closing, pulse blocking

SHYRA-F-800SLDN: SHYRA-F AC control panel
SHYRA-F-800SLDN - Cp 170008110001 - Ci 2610736 - Built-in - (Spare part code, available for order through the Technical Support network)

- Control panel for DEIMOS AC A600 range of sliding operators
- Main features: removable terminal blocks, settings controlled by potentiometers, LED-based fault reporting and incorporated dual channel receiver, electronic clutch management via trimmer, two verified safety inputs, one of wich dedicated to 8k2 safety edge.
- Panel power supply: 230 V, single-phase
- Operator power supply: 230 V single-phase, max. 500 W
- Main functions: pedestrian opening (only by remote control), quick closing, pulse blocking

steel rack, 4-module, cross-section $30 \times 12 \mathrm{~mm}$, length 1 m , screw-fitted on supports attachment Max. load capacity 1000 kg .

## DIMENSIONS (mm)

Fast-action 24V operator for intensive use for sliding gates weighing up to 500 kg and speed without load $25 \mathrm{~m} / \mathrm{min}$, or up to $1,000 \mathrm{~kg}$ and speed without load $18 \mathrm{~m} / \mathrm{min}$. The maximum speed actually achievable by the gate panel depends on the condition of the gate. Operator fitted with electromechanical limit switch. Torque control thanks to D-Track technology. The control unit is set up for communication via the U-Link protocol. The ideal solution for situations which require fast operating speeds, reduced waiting times and high levels of security.

DIMENSIONS (mm)

Fast 230V operators for sliding gates for very intensive use, extremely robust and high-performance thanks to oil bath transmission. Suitable for sliding gates weighing up to $1,000 \mathrm{~kg}$ and speed without load $25 \mathrm{~m} /$ min or up to $2,000 \mathrm{~kg}$ and speed without load $18 \mathrm{~m} / \mathrm{min}$. The maximum speed actually achievable by the gate panel depends on the condition of the gate. Operator fitted with electromechanical limit switch. Torque control thanks to D-Track technology and encoder for the highest possible precision of movement. Control unit for communication with U-Link protocol and with tamper-proof function. The ideal solution for situations which require fast operating speeds, reduced waiting times and high levels of security.

## DIMENSIONS (mm)

230V operators for sliding gates for very intensive use, extremely robust and high-performance thanks to oil bath transmission. Torque control thanks to D-Track technology and encoder for the highest possible precision of movement. Control unit for communication with U-Link protocol and with tamper-proof function. Operator with magnetic limit switch.
The control unit ensures complete safety thanks to the exclusive torque control system that makes these operators comply fully with the current European standards.

## Description

Operator 230 V for sliding gates up to 2000 kg with relative encoder. Leaf speed $9 \mathrm{~m} / \mathrm{min}$. Magnetic limit switch. Equipped with mechanical safety clutch, torque management via D-Track technology and gear unit in oil bath. Control unit for communication with U-Link protoco and with tamper-proof function. Magnetic limit switch. Control unit with display, preconfigured for communication with U-Link protocol.

Powerful, robust operators with 400 V three-phase power supply designed specifically for large, heavy gates.
The heavy structure of the gear motor, the painted galvanised steel casing and the on-board control unit make it the ideal solution for all industrial situations where reliability and power are essential.

Just 13 cm thick, the TIZIANO is one of the most compact operators on the market and can be installed in any architectural context. Thanks to the built-in radio receiver in the control unit, TIZIANO can store the code for 10 MITTO or KLEIO series remote controls and/or wireless control systems such as MIMEPAD or T-BOX.

## Description

Operator for sectional garage doors with tractive force 60 kg and Semi intensive use. Door surface area $10 \mathrm{~m}^{2}$. Opening speed 6,6 m/min. D-Track

VENERE M B GDA: Control panel for one 24 V operator for garage doors
VENERE M B GDA - Cp I113401- Ci 2601397 - Built-in - (Spare part code, available for order through the Technical Support network)

- Control panel for one 24 V operator for garage doors
- Application: control unit for $1 \times 24 \mathrm{~V}$ garage door operator
- Card power supply: 230 V single-phase
- Operator power supply: 24 V 100 W
- Main features: dip-switch programming and potentiometers, incorporated dual channel receiver, D-Track anti-crushing system, slowdown during opening and closing
- Main functions: automatic re-closing, automatic torque control

## VITAL ACCESSORIES

Cp P115015 00001 - Ci 2611383
BIN B GDA 3020 CAT
Chain rail for TIZIANO B GDA, length 3020 mm, useful travel 2560 mm

Cp P115015 00003 - Ci 2611385
BIN B Gda $2 \times 1510$ Cat
Chain track divided into two halves for TIZIANO B GDA, length 3020 mm, useful travel 2560 mm

Cp P115026 00001 - Ci 2601420
BIN B GDA 3020 beLT
Monoblock belt rail, length 3020 mm, useful length 2560 mm

Chain rail for TIZIANO B GDA, length 3620 mm , useful travel 3160 mm

Cp P115015 00004 - Cii 2611386
BIN B Gda $2 \times 1810$ Cat
Chain track divided into two halves for TIZIANO B GDA, length 3620 mm , useful travel 3160 mm

Cp P115026 00002 - Ci 2611389
BIN B GDA 3620 BELT
Monoblock belt rail, length 3620 mm, useful length 3160 mm

Cp $P 11502600003$ - Ci 2601421
BIN B GDA $2 \times 1510$ BELT
Two-piece monoblock belt rail, length 3020 mm, useful length 2560 mm

Cp P 11502600004 - $\mathbf{\text { Ci }} 2601422$
BIN B GDA $2 \times 1810$ BELT
Two-piece monoblock belt rail, length 3620 mm , useful length 3160 mm

## Cp 011409300003 - Ci 2607539 <br> RADIUS LED BT A R1

Flashing light with incorporated antenna for motors with 24 $\checkmark$ power supply.
Cp 11416800003 - Ci 2607544

## RADIUS LED BT A R1 W

Flashing light with incorporated antenna for motors with 24 $V$ power supply. White flashing light.

Cp 111409400003 - $\mathbf{C i} 2607541$
RADIUS LED BT A RO
Flashing light without incorporated antenna for motors with 24 V power supply.

## (11) Cp 112307 - Ci 2614117

## MITTO STYLE C4

4-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Black with chrome keyring loop.

Cp P111782 - Ci 2601411
COMPACTA A20-180
Pair of photocells adjustable $180^{\circ}$ horizontally. 20 metre range. 12-33 VAC/15-35 VDC power supply.

## (1ew) Cp D112306-Ci 2614118

## MITTO COOL C2

2-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Blue.

## Cp N999620 - Ci 2611134

SAS1 KIT B GDA 260 B01
Brackets for ceiling mounting TIZIANO B GDA up to max 30 cm with 1 CR2032 type battery. Blue.

Cp P115005- Ci 2600817
SM1
External manual release for overhead garage door (1 operator)

## Cp D112318- Ci 2614120 <br> <br> MITTO COOLC4

 <br> <br> MITTO COOLC4}4-Channel transmitter. 50/100 m range. 3V power supply
Cp N999621-Ci 2611136
SAS2 KIT B GDA 260 BO1
Brackets for ceiling mounting TIZIANO B GDA up to max 50 cm

Ci 2600786
Cp N73
External release for insulated sectional and overhead doors of thickness up to 50 mm .

Electromechanical operators for intensive/very intensive use, designed for the automation of sectional garage doors.
Features a very compact design, suitable for installation in any situation, thanks to the wide range of chain rails available in various lengths.
The control unit and limit switch with encoder with mechanical stop are incorporated in the operator and rail respectively. The intensity of use makes them suitable for any type of installation, both residential and municipal. The quick Set-Up function from the ground makes installation fast and easy. The high opening speed minimises waiting times and maximises comfort for the end user. The exclusive anti-intruder function (SMART models) secures the garage from unwanted accesses.
The new GREEN models are environmentally friendly, drastically reduce emissions and energy requirements, thanks to a consumption on standby lower than 1W and the total use of recyclable material.

BFE

24 V electromechanical operator for sectional garage doors installable in residential, industrial and commercial environments.
The sturdy mechanical structure and microprocessor technology of the control unit make it possible to use the operator intensively whilst ensuring maximum reliability over time.
In addition, the D-Track torque control system and absolute encoder offer extremely precise control of leaf movement and detection of obstacles.
Exclusive quick programming function of the limit switches from the ground, via remote control.

RIGEL 6 220-230V 50/60HZ: Universal control panel with display for one or two 230V-650+650W operators

\section*{Cp \(D 11383300002\) - Cil 2600589 - RIGEL 6 220-230V 50/60HZ - Recommended}
- Universal control panel with display for one or two 230V - 650+650W operators
- Application: universal control panel for one or two operators
- Card power supply: 230 V single-phase
- Operators power supply: 230V single-phase
- Main features: removable terminal blocks, programming and diagnostics with display, built-in four-channel receiver, electro lock, electronic torque limiter, electronic deceleration at opening and closing, a separate limit switch inputs for each motor, traffic light management, preheating hydraulic operators, weekly timer, possibility to delete a specific remote control, customization of the 4 radio channels, personalization of the duration of the delayed output, adjustable sensitivity to the obstacle.
- Main functions: automatic re-closing, separate motor working times, stays locked when closed, water hammer, 2/3/4 step logic, partial opening, fast closing, separate opening and closing
- Compatibility: RIGEL 5 - RIGEL 4 - RIGEL 3-RIGEL N

VISTA SLK SMART is the range of compact, modern and versatile automations which can be used for both lightweight (up to 100 kg ) and heavyweight (up to 150 kg ) gates.
The profiles are compact in size and give the automation a design which fits in well with any surroundings.
All models in the range are available in the automation kit version (MODULE KIT) to be used with the set of profiles and the belt and in the ASSEMBLED AUTOMATION version, to be ordered in the required size.

The telescopic sliding gate automation VISTA TL has been developed for automating the sliding doors located in entrances in extremely small spaces: when the opening is very small, a telescopic automation helps to widen the opening by up to \(30 \%\).
Used for automating gates weighing up to 120 kg .
VISTA TL is available in the installation kit version to be used with the set of profiles and the belt and in the ASSEMBLED AUTOMATION version, to be ordered in the required size.

The VISTA EMERGENCY redundancy system can be installed on escape routes and emergency exits, replacing traditional automations with sliding doors with breakout swing panels. It offers a sophisticated emergency system that enables evacuation by opening the door panels, in accordance with the requirements of European standard EN16005 - Automated Pedestrian Doors. Safety in use.
The double winding brushless motor fitted to the automation means the door is very quiet when operating and is highly reliable over time with minimal maintenance.
Also available in the automation kit version (MODULE KIT), to be used with the profile set and the belt.

\section*{Description}

Operator for swing doors with motor-driven opening and closing. Maximum gate panel weight 260 kg . Ideal for "fail safe" installations (optional battery) Compact size, ideal for use in small spaces.
Operator for swing doors with motor and spring closure. Maximum gate panel weight 260 kg . Ideal when the gate needs to be closed even when there is no power supply. In this case, the spring allows for manual opening and automatic mechanical closing. Compact size, ideal for use in small spaces.

Electromechanical barrier with inverter technology and three-phase asynchronous motor for high frequency of use, developed and designed for a wide range of operating conditions such as large car parks or motorway toll booths with frequent inversions of movement. Can control access points from 2 to 6 metres wide with fully accessorised barrier. Oil bath gearbox unit. Mechanical crankshaft movement which can deliver fluidity of movement of the bar and control its soft opening and closing movements. Cap with RGB lights (optional) with traffic light function, available parking spaces and self-diagnostics. Easier access thanks to the dual entrance. With U-Link protocol for integration with Parking Management or Building Management systems in a single model.

High intensity LED lighting kit, red-green, to be fitted on BOOM PS/ES bar up to 6 metres long. Power supply unit excluded.
Cp P120091- Ci 2601388
HYPHEN PS
Internal reinforcement/joint for BOOM PS booms. Already included in the Maxima Ultra 36 XL barriers but recommended for barriers \(L\) >= 5 m with or without accessories.
Cp P120113- \(\mathbf{C i}_{\mathbf{i}} 2605261\)
\(\stackrel{\text { PS JOINT }}{ }\)

Joint for BOOM PS booms.

\section*{Cp P120086-Ci 2605234}

\section*{FULL-SKIRT}

Full skirt (top and bottom) for BOOM PS booms. Module length \(L=2 \mathrm{~m}\). Does not include SKIRT BRACKET required for anchoring the first module to the barrier body.

\section*{RECOMMENDED ACCESSORIES}

Cp P120120 - Ci 2614917
KIT ART90 PS MAXIMA ULTRA36
Hinge accessories kit for PS 90º articulated bar on Maxima Ultra 36. Excludes tie rod, bar, bar connector and PS lights. Compatible with PS BOOMS

Cp P120092 00001 - Ci 2602692
ART90 BOOM PS30
Boom bar PS 90º articulated \(\mathrm{L}=5 \mathrm{~m}\) pre-fitted. Excludes LIGHT PS lighting.

\section*{Cp P120080-Ci 2601319 \\ FAF UNI R}

Universal adjustable fork for all rods; recommended with installation of FULL SKIRT accessory.

\section*{Cp 111092600001 - Ci 2600569}

SPIRA 2X1

Magnetic loop \(2 \times 1\) m

\section*{Cp 394075 - Ci 2607020}

\section*{LASER DETECTOR REMOTE CONTROL}

Remote control for settings Safety laser detector and Presence and Safety laser detector.

\section*{Cp 394073 - Cil 2604478}

\section*{LASER SAFETY SENSOR}

Safety laser detector. Its used in combination with magnetc loops in order to add an additional safety device (eg: for pedestrian). Includes two relay outputs. Maximum detection range: \(5 \mathrm{~m} \times 5 \mathrm{~m} .10-35 \mathrm{VDC}\) power supply.

Cp P111274-位 2611230
RME 1 BT
24 V single channel metal object detector with installation base

\section*{Cp P 120032 - \(\mathbf{C i} 2605197\)}

\section*{SRV DIN}

Standard DIN rail for interfacing barrier with parking system, configured and prewired with thermal magnetic switch, additional supply terminals, socket for metal mass detector and standard input/output terminal block

\section*{Cp P120093- Ci 2613063}

ADJ-FOOT
Suspended cushioned telescopic supporting foot for BOOM PS booms.
(new) Cp P120121- Ci 2614918 TIE ROD FOR ART90 PS KIT

Tie rod to be combined with the hinge accessories kit for PS \(90^{\circ}\) articulated bar. Compatible with ART 90 PS MAXIMA ULTRA KIT 36 and ART 90 GIOTTO ULTRA 36 KIT

\section*{\(=\mathbf{C p}\) P120092 00003 - Ci 2601373 ART90 BOOM PS50}

Boom bar PS \(90^{\circ}\) articulated \(\mathrm{L}=5 \mathrm{~m}\) pre-fitted. Excludes LIGHT PS lighting.

\section*{Cp P120079 - Ci 2605230 \\ EBB KIT ATML}

Electric lock for ATML rods to be installed on an FAF UNI R adjustable fork.
Cp P111001 00003
Ci 2611209

RME 2
230 V dual channel metal object detector with installation base

\section*{Cp P111786-Ci 2605171}

LOOP DETECTOR PRO 230V
Metal object detector, 2 channels, 230VAC, up to 4 frequencies per channel for installation of adjacent coils, adjustable sensitivity level, boost function for increasing sensitivity, direction of travel management

\section*{Cp 394080 - Ci 2607023}

PRESENCE AND SAFETY DETECTOR - LASER LOOPS
Presence and Safety laser detector. Its used as an alternative of magnetc loops. Includes one input and two relay outputs. Maximum detection range: \(9.9 \mathrm{~m} \times 9.9 \mathrm{~m} .10-\) 35VDC power supply.
Cp 394160 - Ci 2604482
PALO ø60 H3600
Galvanized steel pole support for panels and traffic lights. Diam. 60mm - h 3600mm
(new) \(\mathbf{C p}\) D112306-Ci 2614118
MItTO COOL C2

2-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Blue.

\section*{ \\ Mítoc cool C 4}

4-Channel transmitter. 50/100 m range. 3 V power supply with 1 CR2032 type battery. Blue.

Electromechanical barriers with speed variator and three-phase induction motor for high frequency of use. Designed and developed to operate in a wide variety of conditions such as large car parks, motorway tollgates with frequent reversing, industrial installations. Three-phase motor with inverter. Oil bath gear motor. Mechanical crankshaft movement (anti-vandalism system) which can deliver fluidity of movement and balance to the bar by also controlling its soft opening and closing. With U-Link protocol for integration with Parking Management or Building Management systems.

\section*{Description}

230 V electromechanical barrier with asynchronous three-phase motor and inverter, for controlling from 4,0 to \(8,0 \mathrm{~m}\) gates. Opening time from 4,5 to 6,05 with deceleration. Maximum barrier length: 8 m . Suitable for installation in areas with high frequency of movement and frequent inversion of barrier movement (e.g. motorway toll booths, car parks with high traffic flows, etc.). Version without spring. Colour RAL 7015 U-Link embedded. Three-phase motor with inverter. Anti-vandalism system mechanical crankshaft. Oil bath gear motor.
230 V electromechanical barrier with asynchronous three-phase motor and inverter, for controlling from 4,0 to \(8,0 \mathrm{~m}\) gates. Opening time from 4,5 to 6,0 5 with deceleration. Maximum barrier length: 5 m . Suitable for installation in areas with high frequency of movement and frequent inversion of barrier movement (e.g. motorway toll booths, car parks with high traffic flows, etc.). Version without spring. RAL colour to order. U-Link embedded. Three-phase motor with inverter. Anti-vandalism system mechanical crankshaft. Oil bath gear motor. Check colour availability and type of finish with your regular supplier.

2 additional limit switches for MAXIMA 30/MAXIMA ULTRA 35

Cp P120049- Ci 2600560
RST ATM
Aluminium rack. Price for 3 metres. Suspended foot not included. Compatible with ATML and ATM model bars.

\section*{RECOMMENDED ACCESSORIES}

\section*{Cp P120032- Ci 2605197 \\ SRV DIN}

Standard DIN rail for interfacing barrier with parking system, configured and prewired with thermal magnetic switch, additional supply terminals, socket for metal mass detector and standard input/output terminal block

\section*{Cp P111786-Ci 2605171}

LOOP DETECTOR PRO \(230 v\)
Metal object detector, 2 channels, 230VAC, up to 4 frequencies per channel for installation of adjacent coils, adjustable sensitivity level, boost function for increasing sensitivity, direction of travel management

\section*{Cp P111274 - Ci 2611230 \\ RME 1 BT}

24 V single channel metal object detector with installation base

\section*{Cp 394073 - Ci 2604478 \\ LASER SAFETY SENSOR}

Safety laser detector. Its used in combination with magnetc loops in order to add an additional safety device (eg: for pedestrian). Includes two relay outputs. Maximum detection range: \(5 \mathrm{~m} \times 5 \mathrm{~m} .10-35 \mathrm{VDC}\) power supply.

\section*{Cp 394160 - Ci 2604482}

PALO ø60 H3600

Galvanized steel pole support for panels and traffic lights. Diam. 60mm - h 3600 mm

\section*{Cp D112318-Ci 2614120 MITTO COOL C4}

4-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Blue.

Range of 24 V electromechanical barriers with opening speeds of between 2.2 and 4 seconds, depending on the length of the bar. Ideal for installation in large car parks, vehicle access points and industrial gates between 2 and 6 m wide. High degree of movement control and impact resistance via encoder. Integrated control unit with U-Link connectivity. Same appearance as Maxima U36 barrier.
Wide range of accessories for any type of application.

GIOTTO M BG BAT KIT

\section*{Cp P111786- Ci 2605171 \\ LOOP DETECTOR PRO 230V}

Metal object detector, 2 channels, 230VAC, up to 4 frequencies per channel for installation of adjacent coils, adjustable sensitivity level, boost function for increasing sensitivity, direction of travel management
Cp P120023 00100 - \(\mathbf{C i} 2613115\)
FAF 2 RAL
Fixed rest fork for booms with customised RAL colour. For bolting to ground.
Cp P120025 00100 - Ci 2613116
FAF 2R RAL
Fixed rest fork for booms with customised RAL colour. For bolting to ground.

Cp N999608- Ci 2611133
ACTR
Pack of 12 additional reflective labels (1 pack already included with each boom)
Cp D573003 - Ci 2600129
SB
Aluminium skirt for road barrier booms. Price per linear metre (Calculate length of useful passage minus 40cm)
Cp P120001 00002 - Ci 2600230
KIT LIGHT1
Lights for booms over \(4,5 \mathrm{~m}\)
```

Cp D940007-Ci2604518
GAM

```

Mobile rest leg for BGV barrier boom (not usable on BGV 30)

Cp 0940009 - Ci 2600134
GAMA AQ AT
Dampened movable support leg for AQ or AT booms (on MOOVI, MICHELANGELO and GIOTTO barriers) -

\section*{Cp P11140100001 \\ Ci 2600207}

VENTIMIGLIA NS
Infrared device for BIR C or BAR C safety edges (conforms to EN 12978 Standard)

\section*{Cp P120018}

THERMO
Thermostatically controlled heating element for use of GIOTTO BT A, MOOVI, MICHELANGELO BT A barriers to ambient temperatures of \(-40^{\circ} \mathrm{C}\)

\section*{RECOMMENDED ACCESSORIES}

Cp P11100100003- Ci 2611209
RME 2
230 V dual channel metal object detector with installation base
Cp 11092600001 - \(\mathbf{C i} 2600569\)
SPIRA 2X1
Magnetic loop \(2 \times 1\) m
new \(\mathbf{C p}\) D112318-Ci 2614120
mitto Cool c4
4-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Blue.

Range of barriers for very intensive use, for clear openings of up to 8 metres.
The wide range of accessories, incorporated flashing light and the arrangement for photocells make them ideal in any context

MERAK BM8: Incorporated control unit for one 24 V operator for sliding gates
MERAK BM8 - Cp 130008410001 - Ci 2610518 - Built-in - (Spare part code, available for order through the Technical Support network)

- Incorporated control unit for one 24 V operator for sliding gates
- Card power supply: 230 V single-phase
- Main characteristics: removable terminal boards withe new colour standard,simplified programming with scenario display, integrated two-channel receiver, D-Track based antisquashing system and slowdown during opening or closing.

MERAK BM6: Incorporated control unit for one 24 V operator for sliding gates
MERAK BM6 - Cp 130007710001 - Ci 2600945 - Built-in - (Spare part code, available for order through the Technical Support network)

- Incorporated control unit for one 24 V operator for sliding gates
- Card power supply: 230 V single-phase
- Main characteristics: removable terminal boards withe new colour standard,simplified programming with scenario display, integrated two-channel receiver, D-Track based antisquashing system and slowdown during opening or closing.

\section*{VITAL ACCESSORIES}

\section*{Cp N728022 - \\ Ci 2600778}

AQG
Complete 6 m rectangular boom for MICHELANGELO

\section*{Cp N728030- Ci 2600780}

AT 706
Round boom diam. 70 mm length 6.35 m for MICHELANGELO. for openings up to 6 m
Cp N728027- Ci 2600526
AT 504
Second part of telescopic round boom for MICHELANGELO, diam. 50 mm , length 4.6 m .
Cp N999607- Ci 2600798
OMEGA AT 70
Accessories pack for AT 704/706

Cp P120028 00002 - \(\mathbf{C i} 2605195\)
PCA N4
Top and bottom rubber cover profile for booms of 4 mmax .

\section*{Cp P120028 00004 - Ci 2600826 \\ PCA N6}

Top and bottom rubber cover profile for booms of 6 m max.

Round boom ø 70 mm , length 4.3 m . for clear spaces up to 4 m ATT 704

Cp N728028- \(\mathbf{C i} 2600779\)
AT 502
Second part of telescopic round boom for MICHELANGELO, diam. 50 mm , length 2.6 m .
Cp N999606- Ci 2600352
OMEGA AO 6
Accessories pack for AQ 6 boom

Cp P120028 00001 - Ci 2600953 PCA N3

Top and bottom rubber cover profile for booms of 3 m max.

Cp P120028 00003

Ci 260519
 PCA N5

Top and bottom rubber cover profile for booms of 5 m max.

Cp P120028 00005 - \(\mathbf{C i} 2601375\) PCA N8

Top and bottom rubber cover profile for booms of 8 m max.

\section*{RECOMMENDED ACCESSORIES}

\section*{Cp P125011-Ci 2605264 \\ BAT KIT 2}

Set of backup batteries for MICHELANGELO BT A barriers
\[

\section*{VITAL ACCESSORIES}

Cp N728033- Ci 2600538
AQ3
Complete 3 metre rectangular boom for GIOTTO and MOOVI
Cp N999507- Ci 2600539
OMEGA AQ
Pack of accessories for installation of \(3 / 5 \mathrm{~m}\) rectangular boom for MOOVI/GIOTTO
Cp N728032 - Ci 2600495
AT5
Complete 5 metre round boom for \(\mathrm{MOOVI} / \mathrm{GIOTTO}\)
Cp N999513-Ci 2600796
OMEGA AT
Pack of accessories for installation of \(3 / 5 \mathrm{~m}\) round boom for MOOVI/GIOTTO

Cp P120028 00002 - \(\underline{\text { Ci }} 2605195\)
PCA N4
Top and bottom rubber cover profile for booms of 4 m max.

Cp P120028 00004
Ci 2600826
PCA N6
Top and bottom rubber cover profile for booms of 6 m max.

Cp N728034- Ci 2600782
AQ5
Complete 5 metre rectangular boom for GIOTTO and MOOVI
Cp N728031- Ci 2600781
AT3
Complete 3 metre round boom for MOOVI/GIOTTO
Cp N728038- \(\mathbf{C i} 2600492\)
AT6
Complete 6 metre round boom for MOOVI/GIOTTO

Cp P120028 00001 - Ci 2600953 PCA N3

Top and bottom rubber cover profile for booms of 3 m max.
Cp P120028 00003 - Ci 2605196
PCA N5
Top and bottom rubber cover profile for booms of 5 m max.

\section*{RECOMMENDED ACCESSORIES}

Cp 0730251
2608500

CBO
Base plate for mod. MOOVI - GIOTTO
Cp P111274- Ci 2611230
RME 1 BT

24 V single channel metal object detector with installation base

Cp P120023- Ci 2600216
FAF 2
Rest fork for booms. For bolting to ground.
Cp P120025- \(\mathbf{C i} 2600825\)
FAF 2R
Universal adjustable fork for booms to be secured to the ground. Recommissioned with SB skirt accessory installation.

Cp 1999608 - Ci 2611133 ACTR

Pack of 12 additional reflective labels (1 pack already included with each boom)

\section*{Cp \(D 573003\) \\ Ci 2600129}

Aluminium skirt for road barrier booms. Price per linear metre (Calculate length of useful passage minus 40 cm )
Cp P120001 00002
Ci 2600230

KIT LIGHT1
Lights for booms over \(4,5 \mathrm{~m}\)

\section*{Cp P120026- \(\mathbf{C i} 2605194\)}

\section*{ZFAF2}

Additional anchor plates for cementing FAF2 forks to ground.
Cp 0940008 - \(\mathbf{C i} 2600367\)
GA AO AT
Movable support leg for AQ or AT booms (on MOOVI, MICHELANGELO and GIOTTO barriers) -
Cp N190104- Ci 2600775
BIR C
Rubber safety edge (H 30 mm ), price per m

\section*{Cp P120018- \(\mathbf{C i} 2605192\)}

\section*{THERMO}

Thermostatically controlled heating element for use of GIOTTO BT A, MOOVI, MICHELANGELO BT A barriers to ambient temperatures of \(-40^{\circ} \mathrm{C}\)

Cp P111001 00003 - Ci 2611209
RME 2
230 V dual channel metal object detector with installation base

\section*{Cp D112306-Ci 2614118 \\ MITTO COOL C2}

2-Channel transmitter. 50/100 m range. 3V power supply with 1 CR2032 type battery. Blue.

\section*{Cp N999509- Ci 2605041 \\ OMEGA AO S/STEEL}

Pack of accessories for installation of \(3 / 5\) m rectangular boom for MOOVI INOX
Cp P111786-Ci 2605171
LOOP DETECTOR PRO 230V
Metal object detector, 2 channels, 230VAC, up to 4 frequencies per channel for installation of adjacent coils, adjustable sensitivity level, boost function for increasing sensitivity, direction of travel management
Cp P120023 00100
Ci 2613115

FAF 2 RAL
Fixed rest fork for booms with customised RAL colour. For bolting to ground.
Cp P120025 00100 - \(\mathbf{C i} 2613116\)
FAF 2R RAL
Fixed rest fork for booms with customised RAL colour. For bolting to ground.

!

Automatic high strength anti-terrorism hydraulic bollard with incorporated hydraulic control unit. Suitable for protecting sensitive sites, thanks to the special "SD" version, which keeps the shaft raised in case of a power failure and with public installations where, in the standard version, the shaft lowers automatically when the power is cut.

DIMENSIONS (mm)

TECHNICAL FEATURES
\begin{tabular}{l|c} 
& PILLAR B 275/600.6C L \\

PERSEO CBE 230.P SD: Control unit with built-in U-Link, receiver and heating circuit (up to \(-40^{\circ} \mathrm{C}\) ) for electromechanical and hydraulic bollards. You can manage up to 4 bollards at the same time (maximum 1 XPASS 330/1200 or 2 XPASS B 275/800 EFO)

\section*{Cp D113812 00002 - Ci 2600139 - PERSEO CBE 230.P SD - Recommended}
- Control unit with built-in U-Link, receiver and heating circuit (up to \(-40^{\circ} \mathrm{C}\) ) for electromechanical and hydraulic bollards. You can manage up to 4 bollards at the same time (maximum 1 XPASS 330/1200 or 2 XPASS B 275/800 EFO)

- Application: Control panel for operating 1 to 4 automatic bollards, single-phase (in parallel) (maximum 1 XPASS 330/1200 or 2 XPASS B 275/800 EFO)
- Board power supply: 230 V single phase
- Output power: 230Vac single-phase, 12A max.
- Main features: removable terminal blocks, digital programming, 3-digit display, Proxima programmer connector, dual-channel receiver 2048 codes included, heater for operation to \(-40^{\circ} \mathrm{C}\), complete support for anti-terrorism bollards, 11 inputs, 9 outputs.
- Main features: U-Link interconnectivity, automatic reclosing, separate open and close, pre-flashing, deadman control, automatic or semi-automatic, opening and closing limit switch management, arranged for UPS.

accessories for control units access control set of batteries for control units b-eba - expansies for control u b-eba - expansion boards receivers receivers
transmitters control devices

TECHNICAL FEATURES

Automatic high strength anti-terrorism hydraulic bollard with incorporated hydraulic control unit. Suitable for protecting sensitive sites, thanks to the special "SD" version, which keeps the shaft raised in case of a power failure and with public installations where, in the standard version, the shaft lowers automatically when the power is cut.

TECHNICAL FEATURES
High strength automatic hydraulic bollard with built-in hydraulic control unit, tested and certified by an independent organisation in accordance with PA568:2010 with 7500/50/N2 rating that includes ASTM F2656:2007 M30 (dynamic simulation). SD version which keeps the bollard raised in the event of a loss of power (protection of sensitive sites). Standard version where the bollard instantly drops in the event of a loss of power.

LOOP DETECTOR PRO 230V
Metal object detector, 2 channels, 230VAC, up to 4 frequencies per channel for installation of adjacent coils, adjustable sensitivity level, boost function for increasing sensitivity, direction of travel management

TECHNICAL FEATURES
Automatic hydraulic anti-terrorism bollard, suitable for protection of sensitive sites, tested and certified (crash-tested) according to the IWA14-1:2013 standard with V/7200 (N2A)/48 rating, equivalent to PAS68:2013 with V/7500 [N2]/48, ASTM2656:2007 M30 rating. Double installation. Independent hydraulic control unit for each bollard: if one control unit breaks, the other bollards will continue to function whilst maintenance work is facilitated.

\section*{Remote control receiver}

External radio receiver in panel, 433 MHz , rolling code.
Depending on the model, it can control 1 or 2 outputs via relays.
The Ultra versions have one or more slots for B-EBA expansion cards for multi-protocol communication.

\section*{Flashing lights for automatic gates}

\section*{RADIUS LED}

The flashing signal light for automatic gates, RADIUS LED by BFT, available in the 24 V and 230 V versions, with or without built-in receiving antenna ( 433.92 MHz ). The 24 V model with built-in antenna is available in the 2 versions with a yellow or smoked grey cap. Thanks to LED technology, energy consumption is reduced by approximately \(80 \%\) compared to models with traditional incandescent light bulbs, while extending the service life of the product. Possibility of installing on a surface (such as a pillar or column) or on the wall using the special accessory. Protection rating IP44.

\section*{Vertical electric locks for automatic gates}

EBP A

Vertical drop-down electric lock, for automated swinging gates. The product is an important accessory for completing the installation in order to safeguard gear motors installed on large gates. It is also an essential element for locking the leaves when gates are equipped with reversible operators. Available in \(230 \mathrm{~V}, 120 \mathrm{~V}\) and in the new 24 V version, it is directly connected to the control unit. The wide operating temperature range of \(-20^{\circ} \mathrm{C}+55^{\circ} \mathrm{C}\) allows it to be used in a large number of applications.

\section*{THALIA BT A}

Control panel with display for one or two 24 V electromechanical operators used on 230 V swing gates. There are two power modules, which are interchangeable and can operate all motors. The radio receiver is incorporated and the memory of the remote controls is removable and expandable. It has an anti-crushing system based on D-Track technology, it controls the slowing down when opening and closing and has an electronic self-learning function. The main functions include automatic closing, fast closing, partial opening and hold-to-run operation. This panel can be programmed using Bluetooth or remotely via wifi/GSM using a dedicated app. The product complies with the new energy efficiency regulations and therefore has a power consumption on standby of less than 0.5 W . \section*{RIGEL}

Universal control board with display for one or two swing or sliding door operators, 230V - 650+650W. Main features: removable terminal blocks, programming and diagnostics with display, built-in four-channel receiver, electro lock, electronic torque limiter, electronic deceleration at opening and closing, a separate limit switch inputs for each motor, traffic light management, preheating hydraulic operators, weekly timer, possibility to delete a specific remote control, customization of the 4 radio channels, personalization of the duration of the delayed output, adjustable sensitivity to the obstacle.

ALENA

Control panel with dip switches and potentiometers for one or two \(230 \mathrm{~V} / 400+400 \mathrm{~W}\) operators used on swing gates and industrial folding doors with management of sensitive edges and security entry verification option. It can control the gate's slowing down both when opening and closing. It can also control the connection with an EBP electric lock or with an ECB (with additional ME card). The radio receiver has rolling code technology incorporated into it. The terminal boards are coloured and can be removed to make it easier to perform the wiring.

SHYRA

Control panel with dip switches and potentiometers for one or two 230V/500W operators used on sliding and swing gates, shutters and overhead doors with the management of up to two sensitive edges (one of which type 8K2). The dual-channel radio receiver is incorporated. With the potentiometers, we can manage not only the automatic closing time but also the strength of the gates and slowing down time. Functions include the pedestrian opening (only remote controlled), fast closing and the pulse blocking function. The detection of faults is done via LED.

}

Tokens for ESPAS 10 COIN

Stand-alone system solution able to work without any wired connection; this is allowing to have a system able to work without the need of expensive civil work for the ducts. This modular system works based on the fact that all information are carried by means of the 2D barcode in the ticket. Easy to install and maintain thanks to the acces placed in front of the station.

Parking system for commercial and professional applications, which can operate wired via an RS485 or TCP/IP network.
The high degree of modularity of the peripherals means it can be adapted to any situation, from the simplest to the most complex systems, with bookings, number plate recognition, electrical car recharging, etc.
All operations at Entry, Pay On Foot and Exit are assisted by display and voice messages in order to enhance the customer experience. The Parking Management Software allows to monitor all system components and rapid analysis of parking usage data.

Floor mounting frames for road enclosure in steel with double protection treatment: galvanic treatment covered with a layer of epoxy paint. Screws in AISI 304 stainless steel.

\section*{ESPAS 30-I ULTRA}

The ESPAS 30-I ULTRA station is a device for managing an entry gate to a parking area.
The unit works in a wired network
as a component between the other elements of the system.
The station performs the rapid issuing of barcode tickets,
management of subscription and operator cards.
The display and voice messages guide improve the user experience.

\section*{Basic components}

Dedicated electronic board with integrated display and onboard joystick for quick programming and consultation of alarms.
Fanfold ticket thermal printer.
Capacity of 4000 fanfold tickets with easy loading.
Proximity card reader for operators and subscriptions.
20 characters \(\times 2\) rows backlit LCD display
Illuminated ticket nozzle
Multilanguage audio and display messages.
Internal temperature regulated by forced ventilation and heating element.
Programmable and highly sensitive two-channels loop detector.
Automatic barrier management.
Assistance call button.
Long-lasting, illuminated, mechanical pushbutton for ticket request RS485 interface.
Guaranteed operation also during server offline periods.
Working mode configurable by software, control board or operator cards.
Alarms management with notification to the parking server.
Optional components
Proximity MIFARE card reader for operators and subscriptions.
Bus or IP intercom.
Barcode scanner.
Management of up to 3 fee rates, allowing issue of tickets
RS485 / LAN converter.
Single lane, two ways gate management.
Double-height terminals availability.
Customizable cabinet colour.

PALO ø60 H3600

Galvanized steel pole support for panels and traffic lights. Diam. 60mm - h 3600mm

Dimensions

The Espas 30-U CC Ultra station is a device for managing an exit gate from a parking area and allows payment of the parking by credit card, scanning the entry ticket.
The unit works in a wired network
as a component between the other elements of the system.
Equipped with ticket scanner and discount amount, proximity reader for operator and subscriber card, C/C terminal with CHIP and PIN and contactless.
The display and voice messages guide improve the user experience.

\section*{Basic components}

Dedicated electronic board with integrated display and onboard joystick for quick programming and consultation of alarms.
Fanfold ticket thermal printer for customer's receipt.
Capacity of 4000 fanfold tickets with easy loading.
Credit card module consisting of card reader, pinpad and contactless reader.*
Barcode scanner.
Proximity card reader for operators and subscriptions.
20 characters \(\times 2\) rows backlit LCD display
Illuminated ticket nozzle
Multilanguage audio and display messages.
Internal temperature regulated by forced ventilation and heating element.
Programmable and highly sensitive two-channels loop detector.
Automatic barrier management.
Assistance call button.
RS485-TCP/IP connection.
Ethernet switch with extended temperature range
Guaranteed operation also during server offline periods.
Working mode configurable by software, control board or operator cards.
Alarms management with notification to the parking server.
*NOTE: composition may change, depending on the country.

\section*{Optional components}

Proximity MIFARE card reader for operators and subscriptions.
Bus or IP intercom.
Barcode scanner.
Cage barriers management.
Customizable cabinet colour.

Dimensions

The ESPAS 30-P ULTRA automatic pay station is designed to provide professional cabled car park systems with a device offering the highest performance for automatic cashier services.
The unit works in a wired network as a component between the other elements of the system.
Thanks to a clear division between the various components, a simple and modern graphic interface, audio and LEDs guides, the user is driven step-by-step during the payment operations.
Multiple versions of the payment station are possible thanks to an extreme modularity for satisfy every needs.

\section*{Basic components}

Payment procedures assisted by dedicated screens.
High visibility RGB LEDs to immidiately indicate payment operations or possible devices issue.
7" high-resolution anti-vandal graphic touch screen display.
Motorized fanfold all-in-one ticket reader / printer module, with sensing of ticket direction.
Alarms management with notification to the parking server.
Dynamic help page to further assist the user during procedures.
Ticket informations
Dedicated operator menu with notification to server of operator access. Dynamic change languages function.
"Print receipt" function.
"Lost ticket" payment function.
Discount ticket reading and validation function.
Automatic refund of missing change by scanning the receipt ticket at the automatic pay station.
Management of subscriptions and user information viewing.
Multilanguage voice guidance.
Payment by entering the vehicle number plate (in parking systems with ANPR).
SOS button to display customized emergency message.
125 kHz proximity RFID or 13,56 MHz MIFARE card reader for operators and subscriptions.
Door opening sensor with notification to the parking server.
Cooling fans and heating element with indipendent thermostats.
Ticket collection bin.
Opposed bar closure and security locks with burglar-proof technology. Standard color RAL 7015.

\section*{Optional components}

Coins Kit: self-refilling coin acceptor with change-giver for 6 denominations and coins collection box with security key. Banknotes Kit: banknote acceptor with collection box and security key. Hoppers Kit: 2 high volume self-refilling hoppers for coin storage expansion (configurable).
Recycler Kit: 2 denominations bill change-giver.
Credit Card Kit: chip \& pin devices (pin-pad, reader, contactless).
Intercom Kit: bus or IP intercom with call button, microphone and speaker.
Customizable cabinet colour.
Additional services sale with dedicated menu.

NEA LITE / TUVA LITE power supply kit: junction box IP56 and PGs, power supply 12VDC din rail mounting

\section*{NEA}

NEA is a High Definition ANPR. It can be integrated in a wired Parking System for a seamless experience.
This device allows users with registered License Plate into the database to enter/exit from Parking withou any stop at the gate. The camera has to be mounted close to the entry/exit stations and allows users with registered License Plate into the database to enter/exit from Parking without any stop by the stations.

SMARTLIGHT is a parking guidance system that helps the driver to easily find free parking spaces within the area.
Illuminated panels together with sensors that are detecting the state (empty/full ) of a stall, the system helps the driver to easily find free spaces. The parking operators can easily monitor the parking area efficiency thanks to the SW that graphically shows the empty/full areas. It also allows to have statistical analysis.

\section*{SMARTLIGHT SINGLE SPACE SENSOR RGB}

All－in－one Ultrasonic sensor for detecting free／occupied parking stall．
The lights shows if the stall is free or occupied．
Reliability and high performance permits immediate status change at any variation in space occupancy．

Main feature
Integrated solution for the Parking management．
RGB LED and high visibility on all sides．
Flexible installation．
Maintainance free device
Operations
The sensor detects the status of the parking stall by measuring the distance with ultrasonic technology． When a vehicle occupy the parking stall the device detects it and gives the indication of＂occupied＂．
LED＇s change from Green（ free space ）to Red（ occupied）

\section*{SMARTLIGHT COMMUNICATION POINT MASTER V2}

Centralyzing control panel for PGS Smartlight.
Manages data collection of all connected devices (up to 96 sensors)
Complete with control unit, terminals, power supply and RS485/LAN communication device.

Basic components
Cabinet with UV protection.
Halogen free materials.
Zone controller
RS485 / LAN converter:
Converter and Zone controller power supply.
Single space sensors power supply
Variable message sign power supply.
Clamps with dedicated communication and power lines for sensors and sign connection.
Operations
The Zone controller uses 3 Bus to supply power and collect data from sensors (Max 96, 32 sensors each Bus ).
For big areas it is possible to connect to the server more Zone controllers.
The Zone controller centralizes data to be transmitted to the Server; receive from the server the status of all devices; transmit information to the variable message indication panels.
The Zone controller collect also data for counters

\section*{BFT S.p.A. GENERAL TERMS OF SALE}

\section*{1. DEFINITIONS}

For the purposes of the interpretation of these general terms of sale (the "General Terms" or "GT") the terms indicated below will have the meaning attributed to them, with the singular including the plural and vice versa:
- Contract: the set of contractual documents that regulates the relationship between BFT S.p.A. and the Customer, including the documents, on paper, digital and/or on another lasting medium, even via the internet, required and/or cited by these General Terms, as well as the Offer and these General Terms together with the respective Annexes;
- BFT S.p.A.: the seller/supplier, a sole shareholder company, subject to management and coordination activity in accordance with Art. 2749-bis of the Italian Civil Code, with registered office in 36015 Schio (VI), Via Lago di Vico no. 40, VAT no., Tax Code and registration number at the Companies Register of Vicenza 00867710246;
- Customer: the company and/or professional who enters into the Contract with BFT S.p.A.;
- Special Terms of Contract: the document (identifiable also in the offer of BFT S.p.A. expressly citing the General Terms of Contract) containing the technical and operational specifications of the Products subject to the Contract as well as any provisions that derogate the General Terms;
- Effective Date: the date of entering into the Contract in accordance with Art. 3 of the GT;
- Force Majeure: any objective and unforeseeable event or circumstance, outside the control of the affected Party, that could not be reasonably avoided and that has the effect of impeding a Party in fulfilling one or all of its obligations envisaged by the Contract;
- Working Day: any calendar day from 8am to 6pm,
with the sole exception of Saturdays and Sundays and other national public holidays in Italy;
- Instructions for Use: any installation, use and maintenance instructions attached to the Contract by BFT S.p.A.;
- Applicable Laws means domestic or state and/or European legislation, even regional, provincial and municipal, orders, decrees, regulations and rules of any public authority having jurisdiction over the execution of the obligations of the Parties indicated in the Contract;
- Sale Offer: this means the document prepared by BFT S.p.A. containing the Product characteristics, the prices, the validity of the offer and the attached General Terms;
- Party or Parties: individually BFT S.p.A. and the Customer and, jointly, both;
- Product(s): the product sold by BFT S.p.A. by way of each Contract;

\section*{2. SCOPE OF APPLICATION OF GENERAL TERMS}
2.1 These General Terms apply to every Contract entered into between BFT S.p.A. and the Customer, for the sale of the Products.
2.2 Any derogations, modifications and/or additions to the GT will only be valid if accepted in writing by BFT S.p.A. The GT remain valid and effective even if BFT S.p.A. carries out, without reserves, a supply or a performance, despite being aware of different or contrary terms of the Customer. The Customer recognises that these General Terms are binding even if its order or correspondence contrasts with them.
2.3 In addition to these General Terms, each Contract between BFT S.p.A. and the Customer will be regulated by the Special Terms indicated in the BFT S.p.A. Order Confirmation. If there is any conflict between the

General Terms and the Special Terms contained in the Offer and/or in the Order Confirmation, the latter will prevail over the General Terms.
2.4 These General Terms are available on the website www.bft-automation.com
2.6 No terms of any nature affixed on orders and/ or other documents sent by the Customer will be applicable unless expressly accepted in writing by BFT S.p.A., as those different terms are not binding even by virtue of tacit consent.

\section*{3. CONCLUSION OF CONTRACT}
3.1 Offers sent by BFT S.p.A., even by way of its agents, representatives or distributors, constitute a mere solicitation of a purchase order which is not binding for BFT S.p.A., also with reference to specifications and/or data relating to the Products. Sales offers made by BFT S.p.A. are exclusively valid for a period of 30 calendar days with effect from the date of the same and will be understood to be valid only for the entirety of the Products included in the same, with no possibility of partial acceptance. Orders must be sent in writing (by e-mail or fax with proof of receipt) by the Customer to BFT S.p.A., indicating the Product code, article and ordered quantity, as well as the Customer's full, exact and truthful tax details, attaching a copy of these GT duly signed and the Special Terms. The Customer undertakes to communicate immediately any change to its contact details and/or tax data to BFT S.p.A.
The purchase order sent to BFT S.p.A. by the Customer constitutes an irrevocable offer having a term of 30 (thirty) days with effect from its receipt pursuant to Art. 1329 of the Italian Civil Code. Purchase orders accepted by the Seller with the Order Confirmation may not be cancelled or modified by the Customer without the written consent of BFT S.p.A.. The transmission of the Customer's purchase order, by the aforementioned methods, involves full acceptance of these GT. BFT S.p.A. reserves the right to add, modify or remove these GT, in whole or in part, up until the Contract with the Customer has been finalised in accordance with Art. 3.2 below.
3.2 The sales Contract is understood to be finalised once 8 (eight) days have elapsed from the date of receipt by the Customer of the BFT S.p.A. Order Confirmation, also containing the Special Terms of Contract.
3.3 The Contract must be signed by persons having the necessary powers, recorded by a power of attorney
or proxy.
3.4 The sales Contract finalised following the Order Confirmation replaces any other commitment, contract or understanding, written or verbal, made previously between the Parties.

\section*{4. DELIVERY TERMS}
4.1 The terms and methods of delivery are those indicated in the Order Confirmation. If the delivery terms and methods are not indicated, BFT S.p.A. undertakes to deliver the Products as soon as possible. For multiple deliveries, if some Products are unavailable, BFT S.p.A. may make the partial delivery of the available Products once the price for the specific Contract has been paid.
4.2 The delivery terms do not constitute essential terms in accordance with Art. 1457 of the Italian Civil Code and, in any case, they do not include transportation times; BFT S.p.A. does not accept any liability for delays due to the carrier/transporter.
4.3 For the purposes of respect of the delivery terms, the Customer must have fulfilled its obligations that make it possible to execute them, therein including providing the necessary documentation and making payment of what is due; in the event of a delay by the Customer, the delivery term will be extended correspondingly.
4.4 In no case will any delays by BFT S.p.A. in delivering the Product entitle the Customer to terminate the Contract and/or to claim any compensation for damages; the Customer hereby waives in advance the right to make any dispute, demand, objection and/or counter-claim in that regard.
4.5 If the Customer is aware that it is unable to receive the Products, it must promptly inform BFT S.p.A., indicating the reason for that impossibility and an appropriate period in which it expects to be able to receive the Products.
4.6 If the delivery is delayed for a reason attributable to the Customer, the cost for storing the Products at BFT S.p.A. will be charged to the Customer itself, in the sum of \(€ 100.00\) (one hundred Euros) per day of delay, notwithstanding that the risk of damage, depreciation, loss and/or theft of the same will transfer to the Customer commencing from the agreed delivery date. If the Products are not collected or if the Customer unjustifiably refuses to collect the Products, BFT S.p.A. will have the right to terminate the Contract, retaining the sums received; it may demand the full payment of
the balance of the price, as well as sell the Products in question to third parties.
4.7 The Customer confirms receipt of the Products by signing the delivery note for the same.

\section*{5. PACKAGING}
5.1 The cost of standard packaging used by BFT S.p.A. is included in the Product price. The use of special packaging may be agreed in writing, with costs borne by the Customer.
5.2 In any case, BFT S.p.A. reserves the right to determine the best type of packaging, taking account of the transportation requirements, subject to specific needs of the Customer specified in the purchase order and accepted by BFT S.p.A. in the Order Confirmation.

\section*{6. CUSTOMER'S OBLIGATIONS}
6.1 Without prejudice to all other obligations in accordance with these GT and the Contract, the Customer must:
- pay the Price indicated in Art. 7;
- be in possession of the facilities and means necessary for the correct use of the Products, know their characteristics and possess the necessary knowledge and technological capacity, in conformity with the Instructions for Use, which it hereby undertakes to respect;
- facilitate, in any possible form, installation and testing work, where envisaged;
- use specialist companies for maintaining the Product; - comply with and respect all legislation and regulations on the sale of the Products, including good commercial practices;
- indemnify and hold harmless BFT S.p.A. from and against any direct or indirect damage, loss, cost or charge, incurred by BFT S.p.A. due to any violation of the GT or the applicable legislation by the Customer.
6.2 BFT S.p.A. will not be liable in any way for the delivery of Products that are not compliant with the technical requirements and standards in force in the Customer's country of destination, as it is the Customer's exclusive responsibility to identify the technical requirements and standards in force in the country of destination of the Products.

\section*{7. PRICE AND PAYMENT TERMS}
7.1 BFT S.p.A. will apply the price indicated in the Contract. If the price is not expressly indicated, the price applied by BFT S.p.A. for the Product in question
will apply, according to the price list in force.
7.2 If changes occur to the circumstances and conditions that affect the formation of the price (in particular, foreign exchange fluctuations or changes of taxes, duties and customs fees) entering into force in the period between the BFT S.p.A. offer and the delivery date, BFT S.p.A. will have the right to adjust the prices applied to the Products, notifying the Customer thereof.
7.3 The price is always shown in Euros and does not include any applicable legal VAT (VAT excluded).
7.4 Unless otherwise agreed in writing with the Customer, the prices are understood to be for goods with standard packaging included, excluding transportation, at one of the sites of BFT S.p.A. communicated by back office.
7.5 Unless otherwise agreed in writing with the Customer, the Customer bears the costs of customs fees, taxes and duties of any nature and type and the costs however due in relation to the Contract. The Customer shall reimburse any sums paid in advance by BFT S.p.A. as payment for the aforementioned items.
7.6 Any complaints or disputes will not in any case entitle the Customer to defer or omit the payment or reduce the price.

\section*{8. INVOICING AND PAYMENT}
8.1 The payment terms and methods are indicated and/or cited in the Order Confirmation.
8.2 For payments made by bank transfer, only the actual date of credit of the amount to the bank account of BFT S.p.A. will be relied upon, using the bank details indicated in the invoice.
8.3 In the event of a payment delay and/or irregularity by the Customer, BFT S.p.A. will have the right to apply default interest on the amount still due, to the extent envisaged by law in accordance with Italian Legislative Decree 231/2002 without prejudice, in any case, to the right of BFT S.p.A. to claim compensation for the greater damage suffered. In the event of lack of, irregular or delayed payment, any sum due in any capacity from the Customer to BFT S.p.A. will also become immediately payable.
8.4 Any lack of or delayed payment, even partial, of the agreed price will entitle BFT S.p.A. to suspend the execution of the Contract until the sums due have been paid in full or to terminate the Contract with all legal consequences; this also applies if the Contract involves the split delivery of the Products or the payment of an
advance prior to delivery.
8.5 In any case, BFT S.p.A. will have the right to suspend the execution of the Contract or to terminate the same if the financial and/or equity conditions of the Customer are likely to endanger the respective payment or when the Customer has not made the prompt and exact payment of Products already delivered by BFT S.p.A., even as part of previous supplies.
8.6 In no case will defects and/or deformities of the Products, even if recognised by BFT S.p.A., or delivery delays, or lack of or delayed collection by the Customer grant to the latter the right to suspend the payments due to BFT S.p.A. by virtue of the Contract or other contractual relationships ("solve et repete" clause).
8.7 In the case of a new Client or in the case of an Order placed by a Client regarding whom the Seller's insurer has issued a negative opinion, the amount due shall be paid prior to delivery or Seller may require an advance payment from such Client. The Seller may grant the Client specific payment terms after prior analysis of the Client's solvency by the insurer or by the Seller's accounting department.

\section*{9. WARRANTY}
9.1 The Products supplied by BFT S.p.A. are manufactured, packaged and sold in conformity with the industry regulations in force in Italy.
9.2 BFT S.p.A. also guarantees that the Products are compliant with the technical specifications contained in the Order Confirmation and is liable only in relation to deformities of the Products with respect to the aforementioned technical specifications.
9.3 Unless otherwise agreed between the Parties, the Products will be covered by a warranty period for defects of 24 months from acceptance (the "Warranty Period"). With reference to Parking Systems, the Warranty Period will be 12 months from acceptance or, where applicable, from the testing date, as certified by the appropriate report dated and signed by the Parties.
9.4 The warranty covers only manufacturing defects of the Products and defects relating to the materials used,
not including alterations of the Products caused by improper use by the Customer or by negligence, voluntary damage, incorrect mechanical and/ or electrical and/or electronic and/or software installation after the sale made by BFT S.p.A., tampering, inadequate or improper attempted repairs carried out by unauthorised personnel external to

BFT S.p.A., use of unoriginal spare parts and, more generally, all defects not attributable to the Product originally delivered.
9.5 The subject of the warranty concerns only the composition and replacement materials of the Product(s) as well as the labour of the manufacturer and/or the support centre authorised by the same to repair the goods.
9.6 In the event of a fault with a Product installed by the Customer (component, installation kit, installation accessories) the labour necessary to disassemble, reassemble and reconfigure the Product within the same is also always excluded, along with any accessory cost incurred by the Customer.
9.7 To exercise the warranty or right of withdrawal, the original pack and complete packaging must be retained, along with the manuals and all original accessories present in the pack when the Product is purchased.
9.8 The Customer must promptly check before using the Products that they are intact and free from defects. Under penalty of forfeiture of the warranty, the Customer must report in writing, by recorded delivery letter with notice of receipt or by certified email, any ascertained defects and/or deformities by and not beyond 8 (eight) days from the delivery date of the Products, or, in the case of hidden defects, by and not beyond 8 (eight) days from discovering the same. The burden of proof in relation to the date of discovery is held by the Customer.
Unless otherwise agreed in writing between the Parties, all accessory costs for the replacement interventions will be at the expense and risk of the Customer.
9.9 The warranty is always and in any case excluded if the defects and/or deformities reported by the Customer have been determined by the following causes:
l) installation of the Product not compliant with the instruction manual provided by the manufacturer of the same or by BFT S.p.A. (on paper and/or by digital medium); in particular, without limitation of the foregoing, BFT S.p.A. does not accept any liability in the event of a failure to respect the instructions for assembly and electrical connection or the electrical regulations or other specific rules in force at the time of installation as well as if accessories and mechanical components have been installed, used or connected which do not comply with the diagrams and types of connections for which they were designed;
II) use of the Product not compliant with its intended
use or limits on use, as indicated in the technical documentation attached to the Product itself and in any case supplied by BFT S.p.A. upon request, even before the supply;
III) lack of ordinary maintenance as indicated in the technical documentation attached to the Product or as regulated by the applicable regulations in force;
IV) faults due to external agents such as: electrical discharges, tampering, even accidental, knocks and falls, even accidental, exposure to liquids, humidity, steam, acids and any substance likely to damage the product, use in extreme environmental or thermal conditions, floods or other natural disasters;
V) removal or voluntary deletion of the serial number affixed on the Product;
VI) storage and/or custody of the Products in places and/or with methods that are unsuitable for their perfect conservation.
9.10 The repair or replacement of the Products during the Warranty Period does not involve any extension of the expiry date of the warranty and no compensation is provided for the period of non-use of the Product.

\section*{10. DEFECTS AND COMPLAINTS}
10.1 In relation to defects and complaints regarding the Product, it is specified that:
a) any packaging defects must be reported in writing, under penalty of forfeiture, upon delivery;
b) no complaint about the quality and/or integrity of the Product and its packaging will be permitted if the Customer fails to make the Product available for the necessary assessments.
10.2 The Customer is obliged to store the Product that it assumes to be defective in an adequate location, making it available for the appropriate investigations and, in any case, doing everything necessary to reduce the risks of its further deterioration.
10.3 Upon discovering the defects, the Customer must immediately stop using the Product that it presumes to be defective and take all necessary measures to reduce any damage.
10.4 Any failure to submit complaints or disputes within the periods indicated above and/or any use of the Product by the Customer despite discovering the defects constitutes unconditional acceptance of the Product itself and a waiver of the right to make any related complaint and/or dispute.

\section*{11. CUSTOMER'S OBLIGATIONS IN THE CASE OF}

\section*{DEFECTS AND COMPLAINTS}
11.1 The Purchaser must, in respect of the terms and conditions indicated in Articles 9 and 10, notify promptly all defects, including any apparent defects relating to quality and quantity.
11.2 For defects that may cause damage, the aforementioned communication must be given by the Customer to BFT S.p.A. immediately.
11.3 Any communication relating to defects of the Products must contain a description of each defect identified.
11.4 If the Customer fails to make the communication in the set terms, it forfeits the right to use the warranty.
11.5 If the Customer has notified of the defects in the set terms but no defect is ascertained, BFT S.p.A. may reject the complaint.
11.6 BFT S.p.A. will not be liable towards the Customer or third parties for any direct or indirect damages to persons or property or animals caused by use of the Product for purposes not appropriate to its nature and/or capacity and/or if the Product is used beyond its range or in the case of forced interruption of its use, as well as resulting from a failure to respect all requirements indicated in the instruction manual, with particular regard to the warnings on installation, configuration, use, maintenance and safety.

\section*{12. FORCE MAJEURE}
12.1 BFT S.p.A. will not be liable for any delay in deliveries or for a breach caused directly or indirectly by:
a) Force Majeure events (including, by way of example, measures of the public authorities, wars, revolts, revolutions, strikes or other labour disputes, fires, floods, sabotage, nuclear incidents, earthquakes, storms, epidemics or pandemics);
b) circumstances, beyond the control of BFT 5.p.A., that prevent the procurement of labour, materials, raw materials, components, systems in general, energy, fuel, means of transport, authorisations or government provisions.

\section*{13. INTELLECTUAL AND INDUSTRIAL PROPERTY RIGHTS}
13.1 The intellectual and industrial property rights which, by way of example but without limitation, include data, designs, advertising brochures and technical documents, are owned entirely and exclusively by BFT S.p.A. and their communication and use as part of these GT does not create any right or
claim for the Customer. The Customer undertakes not to complete any act incompatible with the possession of the intellectual property rights.

\subsection*{13.2 The Customer undertakes, in particular:}
a) to treat the information, data, designs, know-how and documents received and/or learned from BFT S.p.A. as confidential;
b) to limit the use of those information, confidential documents and respective accesses to purposes relating to the execution of the Contract;
c) not to reproduce, without the prior written agreement of BFT S.p.A., the confidential information and documentation;
d) to recognise that BFT S.p.A. is the exclusive holder of the trademark of the Products, where applicable;
e) not to use or register trademarks similar to and/or mistakable with the trademark of the Products.

\section*{14. PRIVACY AND CONFIDENTIAL INFORMATION}
14.1 The Parties recognise that each of them may, during the execution of the Contract, reveal to the other confidential information relating to its business. Each Party undertakes to keep that information confidential and not to reveal the content of the same to third parties, to use that information only for the purposes of the Contract and to return the documents received which contain confidential information promptly at the request of the other Party.
14.2 That confidentiality obligation is understood to be extended to the representatives, consultants, auxiliaries, officers and third parties used by the Parties in executing the Contract.

\section*{15. SAFETY RULES}
15.1 The Products are constructed in respect of Italian safety legislation. The Customer is exclusively responsible in relation to the legislation on safety and protection of public health in force in the country of destination, in which the Product is to be used; any cost relating to the conformity of the Product with the legislative provisions of the country of destination will be borne exclusively by the Customer.

\section*{16. TRANSFER OF OWNERSHIP}
16.1 The Product delivered to the Customer will remain the property of BFT S.p.A. until the latter has received full payment of the price. The retention of title will not in any way affect the transfer of risks. Until the full price has been paid for the Products, even in the case
of deferred payments, the Customer will be considered the simple holder of the same and must therefore store them with all due diligence in accordance with Art. 1768 of the Italian Civil Code. The Customer authorises BFT S.p.A. to complete, at the Customer's expense, every formality necessary to ensure the retention of title is enforceable on third parties.
16.2 Any non-payment of even just one instalment exceeding the legal limits of tolerance will entitle BFT S.p.A. to terminate the Contract in accordance with Art. 1526 of the Italian Civil Code. In any case, the Parties agree that the instalment(s) paid will be retained by BFT S.p.A. by way of indemnity and fair compensation for use of the Products. This is expressly without prejudice to the right of BFT S.p.A. to take legal action for compensation for any greater damage suffered.
16.3 Unless otherwise agreed in writing, the risk of depreciation and accidental deterioration, as well as damage caused by or to the Product, transfers to the Customer at the same time as BFT S.p.A. communicates that the Product is available to it.
16.4 The loss or deterioration of the Product occurring after the transfer of risks to the Customer does not release the latter from its obligation to pay the price.
16.5 In conformity with the provisions of Art. 9.9, the Customer must check the Products promptly before using them, examining the packaging, taking custody of the documents and communicating immediately in writing to BFT S.p.A. any ascertainable defects, for the purposes of the warranty provided by BFT S.p.A.; failing that, the Products will be considered to be approved.

\section*{17. PROHIBITION ON ACTS OF DISPOSAL}
17.1 Until the time of transfer of ownership to the Customer, the Products may not be alienated, sold or transferred in any way or delivered on pledge or in guarantee; if the aforementioned prohibitions are violated, BFT S.p.A. reserves the right to terminate the respective Contract with immediate effect in accordance with and for the effects of Art. 1456 of the Italian Civil Code, without prejudice to the exercise of any other action or protection both in the civil and criminal venue.
17.2 If any enforcement procedures affect the delivered Products, the Customer must immediately inform BFT S.p.A. by recorded delivery letter with notice of receipt or certified email. Failing that, BFT S.p.A. will have the right to terminate the Contract with immediate effect, retaining by way of penalty any sums already paid and
without prejudice to further damages and the recovery of costs incurred.

\section*{18. RESALE}
18.1 In the event of resale of the Products by the Customer, BFT S.p.A. will not be liable for any claim or action of third parties.

\section*{19. EXPRESS TERMINATION CLAUSE - LIMITATION OF LIABILITY}
19.1 Without prejudice to any other Contract provisions or these Terms and Conditions, BFT S.p.A. will have the right to terminate individual Contracts pursuant to and in accordance with Article 1456 of the Italian Civil Code by simple written notice to the Customer and without prejudice to the right to compensation for damages suffered, or that might be suffered, in the following cases:
a) assignment of the Contract without the prior written approval of BFT S.p.A.;
b) Customer's failure to comply with the payment terms set out in the Contract;
c) marketing of Products by the Customer to entities not suitably qualified and specialized for the purpose of ensuring full information to the end user on the technical and operational features of the Products and their correct installation and safe use;
d) violation of the provisions of the Code of Ethics of BFT S.p.A., referred to in the article below;
e) conviction on a final basis of the Customer's representatives, directors and/or shareholders or in the event that Customer's financial situation is such as to jeopardize the fulfilment of the obligations under the Contract or its representatives, directors and/or shareholders are subject to criminal prosecution.
19.2 Unless otherwise agreed in writing between the Parties, all rights to compensation for damages, reduction of the price and withdrawal from the Contract that are not expressly cited in these GT are excluded for the Customer. The Customer is not entitled to compensation for any damage consequent to the suspension of production, loss of enjoyment, loss of orders, loss of earnings and/or other direct or indirect damages.
19.4 Any liability of BFT S.p.A. is excluded, except where this is due to wilful intent or gross negligence. Any compensation that BFT S.p.A. is required to pay for any damage proven by the Customer may not exceed an amount equal to \(5 \%\) of the price of the Contract as
indicated in the Order Confirmation.

\section*{20. WITHDRAWAL}
20.1 BFT S.p.A. will have the right to withdraw unilaterally from the Contract at any time, irrespective of the execution status of the same, with prior written notice to be sent to the Customer, by recorded delivery letter with notice of receipt, at least 60 (sixty) days before the effective date of the withdrawal.
20.2 The withdrawal of BFT S.p.A. will have effect from the day indicated to the Customer as the effective date of the withdrawal in the aforementioned communication.
20.3 Unless otherwise envisaged in the Contract, after the withdrawal by BFT S.p.A. any right of the Customer to any claim, even for compensation, as well as any fee or indemnity and/or reimbursement, is excluded.
20.4 The Customer may withdraw from the Contract if it provides proof that the performance of BFT S.p.A. is impossible due to wilful intent or gross negligence of BFT S.p.A.. Failing that, BFT S.p.A. will have the right to retain the advances received by way of indemnity for executing the Contract in relation to the part of the performance provided, to claim the payment of the residual price by way of conventional penalty and to claim compensation for damages suffered.

\section*{21. PERSONAL DATA PROCESSING}
21.1 Upon receiving the offer and/or registering to the BFT Website, the Customer expresses its consent to personal data processing, in accordance with Art. 13 GDPR - Regulation (EU) 2016/679 and the national legislation on data protection, subject to reading the specific privacy policy available in the full version on the BFT Website.
21.2 Personal data are processed in respect of every precautionary measure to guarantee their security and confidentiality, in conformity with the provisions of the GDPR, and for the sole purpose of being able to fulfil effectively the obligations envisaged by the civil and fiscal laws connected to the economic activity of the company, therein including the management of receipts and payments deriving from the execution of contracts.
The Data Controller is: BFT S.p.A., with registered office in Schio (Vi), Via Lago di Vico no. 44.
To obtain information on personal data processing, communications should be sent to the following email address privacy@bft-automation.com

The privacy policy can be obtained from this address www.bft-automation.com.

\section*{22. APPLICABLE LAW AND LANGUAGE}
22.1 This Contract is regulated by Italian law, excluding the United Nations Convention on Contracts for the International Sale of Goods (Vienna - 1980 - CISG).
22.2 This Contract and its annexes are drafted and signed in Italian and the text of this Contract in Italian is the only one upon which reliance will be made.

\section*{23. COURT WITH JURISDICTION}
23.1 All disputes that may arise between the Customer and BFT 5.p.A. in relation to these GT and/ or any Contract signed in accordance with these GT, including those relating to their validity, interpretation, effectiveness, execution and termination, will be subject to the exclusive jurisdiction of the Court of Vicenza, also for the exercise of any actions aimed at invoking the warranty for the Products.
In derogation of the foregoing, BFT S.p.A. will have the right to take action before the Court in the area in which the Customer is based.

\section*{24. CODE OF ETHICS AND ORGANISATION, MANAGEMENT AND CONTROL MODEL}
24.1 The Customer declares to be aware of the legislation in force on corporate liability and the contents of Italian Legislative Decree 231/2001.
24.2 The Customer acknowledges that BFT S.p.A. has adopted a Code of Ethics in conformity with the provisions of Italian Legislative Decree 231/2001. The Customer also declares to have read its text, published on the website www.bft-automation.com.
24.3 The Customer undertakes not to implement and to ensure that its directors, employees and/or collaborators do not implement acts or behaviours that violate the Code of Ethics of BFT S.p.A. and, more generally, not to commit the crimes cited in Italian Legislative Decree 231/2001.
24.4 The Customer also guarantees that it has established suitable measures to guarantee that the activity under this Contract is carried out in conformity with the provisions of the Code of Ethics of BFT S.p.A.
24.5 In the event of a breach by the Customer of Italian Legislative Decree 231/01, BFT S.p.A. may terminate the Contract in accordance with Art. 1456 of the Italian Civil Code, giving simple written communication thereof to the Customer by recorded delivery letter with notice of receipt, without prejudice to the right to
compensation for damages.
24.6 Upon the opening of any criminal proceedings against the Customer for crimes relevant under Italian Legislative Decree 231/2001, BFT S.p.A. must be notified immediately and it will have the right to terminate the Contract in accordance with Art. 1456 of the Italian Civil Code.
24.7 The Code of Ethics and the Organisation Model of BFT can be found at this address: http://www.bft-automation.com/it_IT/bft/modello-organizzativo-e-codice-etico/.
The Customer is aware of the fact that the export or transfer of Products outside the European Union customs market or to certain entities/certain destinations may be subject to control by the competent authorities and it declares and warrants that it has implemented all measures necessary to respect the national, European and US legislation in force on export controls and international economic sanctions.
If the Products are exported or transferred by the Customer, the Customer undertakes to export or transfer those Products to customers that are not included in lists of natural or legal persons, entities or organisations subject to restrictive measures by the European Union and/or in the List of Specially Designated Nationals and Blocked Persons ("SDN List") prepared by the Office of Foreign Assets Control ("OFAC") and that they are not owned or controlled by persons or entities appearing in those lists.
The Customer will indemnify BFT S.p.A. from any liability that may be incurred by BFT S.p.A. through any violation of the provisions applicable from time to time on the control of exports and international economic sanctions in relation to the Products. The Customer undertakes to transfer the provisions of this article also to any sub-purchasers.
If the fulfilment of the obligations by BFT S.p.A. is impeded, aggravated or made excessively onerous due to the occurrence of one or more of the following events (hereafter "Exempting Events"):
a. modification of the national, European or US legislation, including the adoption of restrictive measures or international economic sanctions against third countries, having an impact on the obligations of BFT 5.p.A. and/or
b. modification, extension or revision or any other change in interpretation, by any court or administrative authority, of the laws in force at the date of acceptance
of the orders by BFT S.p.A.;
c. lack of issuance, by any competent authority, of authorisations to sell, transfer or export the Products, where envisaged by the applicable laws;
d. any other event, whether or not it is similar to those indicated above, beyond the control of the party against which the respective dispute could be brought, BFT S.p.A. will notify that event in writing to the Customer and will consult the same to identify any fulfilment useful for guaranteeing the correct and precise execution of the existing obligations. The execution of the respective obligations will be understood to be suspended during the consultation period. If, after the consultation, it emerges that the obligations of BFT S.p.A. cannot be executed due to intervening invalidity or unlawfulness in accordance with the applicable law, the order is understood to be terminated and the Customer does not accrue any right to compensation for damages. If the fulfilment of the existing obligations for BFT S.p.A. is not considered illegal or invalid but has become impossible or excessively onerous, the order will be suspended until the Exempting Event has ended and BFT S.p.A. and the Customer will undertake to mitigate any prejudice deriving from that suspension. If the Exempting Event continues beyond a period of four months, the same will constitute an event of Force Majeure.

\section*{25. TRAINING AND TECHNICAL SUPPORT}
25.1 At the Customer's request, BFT will carry out training courses for the Customer's staff on the use, maintenance and repair of the Product. All costs and expenses relating to the organisation and holding of those courses will be borne exclusively by the Customer and the rates of BFT S.p.A. for those courses will be those currently applied by BFT S.p.A. for such activities at the time of the Customer's request.

\section*{26. MISCELLANEA}
\(\mathbf{2 6 . 1}\) If one or more provisions of these General Terms is/are considered to be invalid, void or inapplicable for any reason, the remaining provisions will remain valid and binding.
\(\mathbf{2 6 . 2}\) In no case may the Customer transfer the rights or obligations deriving from this Contract without the prior written consent of the other Party.
26.3 Any lack of exercise by BFT S.p.A. of a right or faculty due by virtue of the law or these GT or the Contract, or any tolerance by BFT S.p.A. of behaviours
of the Customer may not in any case be considered as a waiver of the right to invoke the aforementioned rights or faculties. The express waiver of a provision of the GT will be effective only for the specific case and purpose for which it was granted.
26.4 The Parties are autonomous and independent contracting parties, with no relationship of economic dependence.
26.5 The rights and obligations of the Parties that, by their nature, are understood to be effective even after the termination of the Contract, will remain effective and binding even after the termination of the Contract, for any reason it occurs.

\section*{27. TECHNICAL RULES - QUALITY SYSTEM}
27.1 The Customer recognises and acknowledges that the range of Products is constituted by mechanical, electromechanical, electric, electronic products, software and their accessories, whose manufacture, marketing, installation and maintenance are, in the majority of cases, subject to specific rules; therefore, their distribution and installation requires the intervention of qualified and specialist professionals, who provide to end users full information on the technical and operational characteristics of the Products, their correct installation and safety of use (in particular, UNI standards, Italian Electrotechnical Committee rules and Legislative Decrees on systems). In particular, the Customer recognises and acknowledges that all automated closures fall within the field of application of the Machinery Directive, with all legal consequences for dealers and installers and with the obligation to retain the technical file of the automated closure, maintenance and EC declaration of conformity, just as the other products intended for electrical systems, home automation and safety fall within the scope of application of the Italian Electrotechnical Committee rules and the Laws of the State of installation on electrical and/or safety systems.

\section*{28. SOFTWARE SUPPLIED BY THE SELLER}
28.1 If the Product requires, for its functioning, software developed by BFT S.p.A., BFT S.p.A. will provide that software to the Purchaser, together with the Product, under the conditions indicated below.
28.2 The Software, therein including any updates supplied by BFT S.p.A., remains the exclusive property of BFT S.p.A. The Customer may use it, in the capacity
of licensee, only for the functioning of the Product with which it was supplied and it may not transfer, disclose or reproduce it for third parties, or perform any modification or intervention on the same, except with the prior written authorisation of BFT S.p.A..
\(\mathbf{2 8 . 3}\) If the payment for the Software (or the Product for which the software is intended) is delayed, BFT S.p.A. may grant the use of the software for a limited period, extending its duration following the due payment of the instalment at the due date. It is understood that no limitation of this nature may be applied after the price has been paid in full.

\section*{29. ANTICORRUPTION}

Either Party shall perform its obligations in compliance with the applicable laws and regulations, and undertakes to respect anti-corruption and money laundering applicable laws, in particular the U.S. 1977, Foreign Corrupt Act (FCPA), the Organization for Economic Cooperation and Development's Convention of 1997 on Bribery of Foreign Public Officials in International Business Transactions (OECD Anti-Bribery Convention), the Law on the Prevention of Money Laundering and Terrorism and Proliferation Financing, as well as the Law on International Sanctions, and any other applicable anticorruption laws. In this frame, Customer expressly allows the Seller to perform any audit and agrees to respond in good faith to any related questionnaire. In case of proven act of corruption or breach by Customer of these obligations, the Seller may suspend or terminate orders without notice or compensation and subject to any damages to which the Customer may be entitled as a result of such breach.

\section*{30. HARDSHIP}

In case of an unforeseeable financial or material circumstances (the "Unforeseeable event") related to the sale by the Seller of Products covered by the GTC, resulting in the execution of any of the Parties obligations to become excessively expensive, the Parties undertake to renegotiate in good faith the term of their agreement. During the negotiation, the Parties will suspend their respective obligations related to the sale of the Products concerned by the Unforeseeable event. If Parties fail to reach an agreement, they would have to mutually agree to terminate the agreement. Read, confirmed and signed

Place and date

In accordance with and for the effects of Art. 1341 and 1342 of the Italian Civil Code, the Customer declares expressly to approve the following articles: Art. 4 (Delivery Terms); Art. 6 (Customer's Obligations); Art. 8 (Invoicing and Payment); Art. 9 (Warranty): Art. 11 (Customer's Obligations in the case of Defects and Complaints); Art. 13 (Intellectual and Industrial Property Rights); Art. 14. (Privacy and Confidential Information); Art. 16 (Transfer of Ownership); Art. 19 (Express Termination Clause - Limitation of Liability) Art. 20 (Withdrawal); Art. 22 (Applicable Law and Language); Art. 23 (Court with Jurisdiction); Art. 24 (Code of Ethics and Organisation, Management and Control Model).
