RADIUS LED

Flashing lights for automatic gates

The flashing signal light for automatic gates, RADIUS LED by BFT, available in the 24V and 230V versions, with or without built-in receiving antenna (433.92 MHz). The 24V model with built-in antenna is available in the 2 versions with a yellow or smoked grey cap. Thanks to LED technology, energy consumption is reduced by approximately 80% compared to models with traditional incandescent light bulbs, while extending the service life of the product. Possibility of installing on a surface (such as a pillar or column) or on the wall using the special accessory. Protection rating IP44.

EasyAXS

EASY CONNECT. EASY ACCESS.

The new connectivity solution which boosts the potential of BFT products and services to make access automations smarter and easier to use for both installers and end users.

1

EASY TO CONNECT

PLUG&PLAY
CONNECTIVITY MODULE
FOR QUICKLY CONNECTING
BFT SOLUTIONS

2

EASY TO SET UP

CONFIGURATION
AND
MANAGEMENT OF
THE MOTOR WITH
THE **EasyAXS app**

3

EASY TO CONTROL

TaHoma app
TO PROVIDE CUSTOMERS
WITH A SMART SOLUTION
FOR ACCESSING THEIR
HOMES

U-LINK 2.0

AN UPDATED VERSION OF
U-LINK TO GIVE YOU EVEN
MORE FUNCTIONALITY

Scalable

You can add as many devices as you want

Intuitive

Easy to install and to use

Functional

Settings can be controlled and firmware updated remotely using dedicated applications

Practical

Works with or without an internet connection

Flexible

It allows you to create groups of interconnected products

U-Link, the exclusive **BFT** technology platform has evolved to offer improved interaction with the latest generation of technological ecosystems. Its ability to interface with all home access automation access devices has been expanded, meaning it is now a very useful tool for installers. It is also a faster communication protocol with increased security for communicating information.

It allows you to save even more time, checking everything very easily and giving you even more peace of mind.

U-SECURITY

A NEW AND EVEN MORE SECURE RADIO PROTOCOL

Secure

By transmitting data protected by a cryptographic key

U-Security is the new technology from **BFT** which incorporates encrypted rolling code thanks to the encryption key which masks the remote control code, meaning that it is impossible to clone a BFT remote control using another brand's model.

Easy

Pairing a remote control with a receiver can be done easily by scanning the QR code and using the dedicated app

The functions of the **Er Ready** system are incorporated and a new procedure is also available for programming remote controls by scanning a QR CODE and using a special app. All products featuring this technology are **REPLAY**, so they can transmit the code to another BFT remote control using a combination of keys.

Universal

The radio protocol is also compatible with the previous generation of receivers
