BOTTICELLI / EOS120

Automation systems for garage doors

Empowered by
U-LINK

Electromechanical operators for intensive/very intensive use, designed for the automation of sectional garage doors. Suitable for installation in any context, thanks to the wide choice of chain rails available in the various lengths. The control unit and limit switch with encoder with mechanical stop are incorporated in the operator and rail respectively.

Relevant features

Built-in control unit with automatic learning of opening and closing force.

High-strength galvanised steel rail with ducts to facilitate the routing of the cables.

Encoder and exclusive D-Track force management system for safe installations in all conditions.

Code	Name	Description
P915194 00002	BOTTICELLI	24 V operator for sectional garage doors with tractive force 60 kg and intensive use. Max door surface area 10 m ² . Opening speed 5 m/min. D-Track

	BOTTICELLI
Control unit	VENERE
Nominal voltage	24 V
Power consumption	150 W
Max. door/gate weight	60 kg
Door surface area	10 m ²
Type of limit switch	Encoder + mechanical stop for opening
Gate panel speed	5 m/min
Slowdown	Yes
Locking	Mechanical
Release	Steel cord or cable
Impact reaction	D-Track
Frequency of use	intensive
Protection rating	IPX0
Environmental conditions	-15 ÷ 60 °C

RECOMMENDED ACCESSORIES

	P115020 00001 - BIN CATENA 2900 SINT Chain rail for BOTTICELLI, length 2900 mm, useful travel 2400 mm		P115020 00002 - BIN CATENA 3500 SINT Chain rail for BOTTICELLI, length 3500 mm, useful travel 3000 mm
	P115021 00002 - BIN CATENA 2X1750 SINT Chain rail divided into two halves for Botticelli, length 3500 mm, travel 3000 mm		P115022 00001 - BIN CINGHIA 2900 PIG FE Belt rail for BOTTICELLI, length 2900 mm, useful travel 2400 mm
	P115022 00002 - BIN CINGHIA 3500 PIG FE Belt rail for BOTTICELLI, length 3500 mm, useful travel 3000 mm		P115023 00001 - BIN BELT 2X1450 Pig FE50 Chain rail divided into two halves for Botticelli, length 2900 mm, travel 2400 mm Belt rail divided into two halves for Botticelli BT A 650-850 compatible with Botticelli 600-800, length # {td-7563-80-3}, travel 2400 mm
	P115023 00002 - BIN CINGHIA 2X1750 Pig FE Belt rail divided into two halves for BOTTICELLI, length 3500 mm, travel 3000 mm		N999060 - APT Assembly for fitting BOTTICELLI, EOS 120 at over 30 cm from the ceiling

Automation systems for garage doors

RECOMMENDED ACCESSORIES

	N999370 - TA BIN		P115005 - SM1
	Vibration damper plugs for EOS120 and BOTTICELLI, (pack of 4 plugs)		External manual release for overhead garage door (1 operator)
	P115003 - ST		P115029 - BRTS
	Automatic bolt release for sectional doors		Triangular slide arm for overhead doors For BOTTICELLI SMART BT A 850-1250, BOTTICELLI B CRC 480, EOS 120, BOTTICELLI 800 U and EOS 120 U operators.

Automation systems for garage doors

Empowered by
U-LINK

What is U-Link?

The technology that gives you more power

U-Link, Universal Link, is an exclusive BFT platform that can be used to create high-tech ecosystems.

In Home Access Automation, it can be used to communicate with all home access automation devices of any brand. This saves you time and allows you to control everything easily and without any worries.

It is intuitive

Easy to install and to use

It is scalable

You can add as many devices as you want

It is flexible

It allows you to create groups of interconnected products

It is practical

Works with or without an internet connection

It is functional

Its settings can be controlled remotely using dedicated applications

Automation systems for garage doors

Everything on one screen: find out more about this amazing technology

A world-exclusive platform that **can be used to create high-tech ecosystems** offering a vast range of solutions for many different sectors.

This proprietary platform which is a key feature of BFT products, thanks to the B-EBA cards and the Clonix U-Link receiver, is suitable for any protocol or product for access automation (including BFT products non-BFT ones and older versions) and it can be used in a variety of different sectors. This means any device becomes a smart device which can be interconnected with other systems, using a language that is becoming universal.

**U-Control HOME**

U-Control HOME is the application that allows you to open the gate to your home and to remotely control BFT automations using your own smartphone. The iOS version can be used to automatically open the automation when you are close to it.

**U-Base 2**

A software package for installation, performing maintenance and identifying any faults in the U-Link compatible operators, easily and conveniently.

**U-SDK**

U-SDK is the application which allows BFT automations to be made compatible and easily integrated with a BMS network.

**Clonix U-Link**

Connect non-native U-Link and non-BFT products to U-Link systems.

Is it possible to connect non-native U-Link BFT operators or other brands of products to U-Link? Yes, thanks to the Clonix receivers. Accessories which accept no limits.

**B-EBA**

A direct link to your operators.

The B-EBA expansion cards make it possible to connect external devices such as PCs, smartphones and tablets to a BFT operator and a Clonix receiver or to connect multiple BFT products in a U-Link network. These accessories integrate with U-Link technology and with Bluetooth, Wifi, Z-Wave and TCP/IP protocols as well as with the RS485 serial interface. A device that demonstrates exactly what BFT means by interconnectivity.
