PHEBE

Automation systems for garage doors

Electromechanical operator for residential use for the automation of overhead garage doors. The built-in control unit manages the second operator for installation on large-size doors or doors with integrated pedestrian doors. The microprocessor technology also manages the torque of the motors with maximum precision and in total safety.

Relevant features

Release knob protected by a safety door; can also be operated from outside by means of a steel cable.

Quickly and easily adjustable limit switched on board motor.

Control unit incorporated with torque self-learning system, programming display and on-board radio receiver.

Automation systems for garage doors

PHEBE

Code	Name	Description
R915126 00102	PHEBE N KIT	Kit for up&over garage doors of maximum surface area 7 m ² . Operator with incorporated panel, slowdown and duty Semi intensive. Manoeuvre time 17-20 s, IP44 Control unit incorporated with torque self-learning system

RECOMMENDED ACCESSORIES

 Ph. Out D113730 00002 - HYDRA N CPEL	 N733299 - CTBP
HYDRA N control board in CPEL panel	Pack of 1800 mm drive tubes and fixing bases for completing the PHEBE N KIT
 D412377 - BCP	 N733288 - BLP
Short welding base for PHEBE series operators (L 578 mm)	Long welding base for PHEBE series operators (L 1600 mm)
 N733120 - CTA	 N733129 - CTA2
2 square drive tubes of cross section 20x20 mm and length 1800 mm for PHEBE N series operators	2 square drive tubes of cross section 20x20 mm and length 200 mm for PHEBE N series operators
 N733112 - CBA	 N733119 - CBAS
Straight telescopic arms for the installation of PHEBE series operators on overhead door	Straight telescopic arms for the installation of PHEBE series operators on overhead door of length 1000 mm
 N733113 - CBASL	 Ph. Out N733114 - CBAC
Straight telescopic arms for the installation of PHEBE series operators on overhead door of length 1500 mm	Curved telescopic arms for the installation of PHEBE series operators on overhead door
 N733221 - CBAC-G	 P115005 - SM1
Curved telescopic arms for installation of PHEBE BT A series operators on up-and-over doors	External manual release for overhead garage door (1 operator)
 P115001 - SM2	 P125005 - BT BAT
External manual release for overhead garage door (2 operators)	Back-up battery kit for HYDRA N, ARGO, VENERE BT A DIS
 P125007 - BT BAT1	
Emergency battery kit for HYDRA N CPEL, only for external board not compatible with board on motor	

Automation systems for garage doors

What is U-Link?

The technology that gives you more power

U-Link, Universal Link, is an exclusive BFT platform that can be used to create high-tech ecosystems.

In Home Access Automation, it can be used to communicate with all home access automation devices of any brand. This saves you time and allows you to control everything easily and without any worries.

It is intuitive

Easy to install and to use

It is scalable

You can add as many devices as you want

It is flexible

It allows you to create groups of interconnected products

It is practical

Works with or without an internet connection

It is functional

Its settings can be controlled remotely using dedicated applications

Automation systems for garage doors

Everything on one screen: find out more about this amazing technology

A world-exclusive platform that **can be used to create high-tech ecosystems** offering a vast range of solutions for many different sectors.

This proprietary platform which is a key feature of BFT products, thanks to the B-EBA cards and the Clonix U-Link receiver, is suitable for any protocol or product for access automation (including BFT products non-BFT ones and older versions) and it can be used in a variety of different sectors. This means any device becomes a smart device which can be interconnected with other systems, using a language that is becoming universal.

U-Control HOME

U-Control HOME is the application that allows you to open the gate to your home and to remotely control BFT automations using your own smartphone. The iOS version can be used to automatically open the automation when you are close to it.

U-Base 2

A software package for installation, performing maintenance and identifying any faults in the U-Link compatible operators, easily and conveniently.

U-SDK

U-SDK is the application which allows BFT automations to be made compatible and easily integrated with a BMS network.

Clonix U-Link

Connect non-native U-Link and non-BFT products to U-Link systems.

Is it possible to connect non-native U-Link BFT operators or other brands of products to U-Link? Yes, thanks to the Clonix receivers. Accessories which accept no limits.

B-EBA

A direct link to your operators.

The B-EBA expansion cards make it possible to connect external devices such as PCs, smartphones and tablets to a BFT operator and a Clonix receiver or to connect multiple BFT products in a U-Link network. These accessories integrate with U-Link technology and with Bluetooth, Wifi, Z-Wave and TCP/IP protocols as well as with the RS485 serial interface. A device that demonstrates exactly what BFT means by interconnectivity.
