# MAGISTRO

## Home remote control systems

Bft interconnectivity does not only show what the technology can do, but what it can do that is useful: Magistro is an innovative system for the control and management of automatic gates, roller shutters or lights in your home or office. It allows local or remote control via PC or App through a simple and intuitive interface. Easy to install, simple to use, it is based on Z-Wave wireless technology. A Total Control solution perfectly Tuned to you. A system designed for those who install it, and for all those who use it. That's why Bft has created an open system, and therefore easy to integrate. Scalable, and therefore gradually completable with a small expense. Quick to install, and therefore cost effective.

### Relevant features

It allows local or remote control via PC or App through a simple and intuitive interface.

U-Link

Maximum integration with compatible Bft U-Link automation systems.

Z-Wave

Compatible with more than 1500 consumer products already on the market and arranged for Z-Wave protocol.

## Home remote control systems

## MAGISTRO

Code	Name	Description	
R400000	MAGISTRO BRAIN KIT	Magistro Brain control system, containing one Beba Z-Wave Gateway	 U-Link
P111766	MODULO MAGISTRO ROLL R1	Z-Wave wireless module for shutter motor control via already powered contact 110/230 Volt	 U-Link
P111767	MODULO MAGISTRO UNI R1	Z-Wave wireless module, switch control for lights/devices via voltage-free contact up to 230 V	 U-Link
P111765	MODULO LIGHT DIMMER R1	Z-Wave wireless module, dimmer control to adjust the brightness of the incandescent lamps 24/110/230 Volt	 U-Link
P111535	BEBA Z-WAVE DRIVER	Expansion card for connection with Z-Wave wireless protocol	 U-Link

# What is U-Link?

The technology that gives you more power

U-Link, Universal Link, is an exclusive BFT platform that can be used to create high-tech ecosystems.

In Home Access Automation, it can be used to communicate with all home access automation devices of any brand. This saves you time and allows you to control everything easily and without any worries.

## It is intuitive

Easy to install and to use

## It is scalable

You can add as many devices as you want

## It is flexible

It allows you to create groups of interconnected products

## It is practical

Works with or without an internet connection

## It is functional

Its settings can be controlled remotely using dedicated applications

## Home remote control systems

## Everything on one screen: find out more about this amazing technology

A world-exclusive platform that **can be used to create high-tech ecosystems** offering a vast range of solutions for many different sectors.

This proprietary platform which is a key feature of BFT products, thanks to the B-EBA cards and the Clonix U-Link receiver, is suitable for any protocol or product for access automation (including BFT products non-BFT ones and older versions) and it can be used in a variety of different sectors. This means any device becomes a smart device which can be interconnected with other systems, using a language that is becoming universal.

### U-Control HOME

U-Control HOME is the application that allows you to open the gate to your home and to remotely control BFT automations using your own smartphone. The iOS version can be used to automatically open the automation when you are close to it.

### U-Base 2

A software package for installation, performing maintenance and identifying any faults in the U-Link compatible operators, easily and conveniently.

### U-SDK

U-SDK is the application which allows BFT automations to be made compatible and easily integrated with a BMS network.

### Clonix U-Link

Connect non-native U-Link and non-BFT products to U-Link systems.

Is it possible to connect non-native U-Link BFT operators or other brands of products to U-Link? Yes, thanks to the Clonix receivers. Accessories which accept no limits.

### B-EBA

A direct link to your operators.

The B-EBA expansion cards make it possible to connect external devices such as PCs, smartphones and tablets to a BFT operator and a Clonix receiver or to connect multiple BFT products in a U-Link network. These accessories integrate with U-Link technology and with Bluetooth, Wifi, Z-Wave and TCP/IP protocols as well as with the RS485 serial interface. A device that demonstrates exactly what BFT means by interconnectivity.
