

BLUE ENTRY

BLUE ENTRY

Home remote control systems

An innovative application for access automation management with just a tap on your mobile phone or smartphone (Android and iOS operating system).

Operation is in manual mode requiring confirmation by the user before opening, and in automatic mode allowing opening only by approaching the gate.

Maximum flexibility and modularity over time: Blue Entry lets you control and nominate up to 4 different accesses, assigning the most convenient manual/automatic opening mode for each.

Maximum control and protection of accesses, thanks to the high data encryption guaranteed by the Bluetooth standard and by passwords for accessing the Bluetooth expansion card installed in the Bft control unit.

With the special "POWER SAVING FUNCT. (Android) and BLUETOOTH LOW ENERGY (iOS)", Blue Entry allows you to optimise and extend the battery life of the device and ensure efficient operation over time.

Relevant features

Operation is easy and intuitive, thanks to automatic gate detection by the smartphone and the guided GUI.

The automatic gate opening function means trying to find your keys or remote is a thing of the past, and opening the gate is no longer a problem when you have your hands full with the shopping, for example, or while riding a motorcycle.

The system uses the Bluetooth technology, the communications standard for mobile devices, which ensures secure access and cost free operation.

EasyAXS

EASY CONNECT. EASY ACCESS.

The new connectivity solution which boosts the potential of BFT products and services to make access automations smarter and easier to use for both installers and end users.

FOR ACCESSING THEIR

Somfy TaHoma

HOMES

EASY TO CONNECT

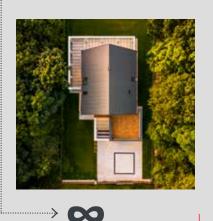

MOBILE MODULE + ANTENNA + SIM

AN UPDATED VERSION OF U-LINK TO GIVE YOU EVEN MORE FUNCTIONALITY

Scalable

You can add as many devices as you want

Intuitive

Easy to install and to use

Functional

Settings can be controlled and firmware updated remotely using dedicated applications

Practical

Works with or without an internet connection

Flexible

It allows you to create groups of interconnected products

U-Link, the exclusive **BFT** technology platform has evolved to offer improved interaction with the latest generation of technological ecosystems. Its ability to interface with all home access automation access devices has been expanded, meaning it is now a very useful tool for installers. It is also a faster communication protocol with increased security for communicating information.

It allows you to save even more time, checking everything very easily and giving you even more peace of mind.

A NEW AND EVEN MORE SECURE RADIO PROTOCOL

Secure

By transmitting data protected by a cryptographic key

Easy

Pairing a remote control with a receiver can be done easily by scanning the QR code and using the dedicated app

The functions of the **Er Ready** system are incorporated and a new procedure is also available for programming remote controls by scanning a QR CODE and using a special app. All products featuring this technology are REPLAY, so they can transmit the code to another BFT remote control using a combination of keys.

Universal

The radio protocol is also compatible with the previous generation of receivers

INFORMATION REGARDING THE PROTECTION OF THE INDUSTRIAL AND INTELLECTUAL PROPERTY RIGHTS OF BFT. BFT 5.p.A. protects its industrial property by depositing trademarks, patents, models and designs. The intellectual property of BFT 5.p.A. is protected by copyright law. BFT 5.p.A. also protects its know-how by taking measures to protect the technical and commercial information inherent in its company and products.
